Seems cool, testing it now :) Thx for sharing^^

No Problem. It really isn't the greatest code, but its a start. The junk it generates is basic and could use improving. Enjoy :)

I am actually impressed myself of the newer version (1.1) where it junks the whole project. This would be extremely useful. I would love to see someone's improvements to this version :)

I just wish I had the time to work on it more and make it so it doesn't need "tags" to place the junk.

I wanted to test your app, but after starting it, it instantly crashes without a warning.

I use Windows 7, 64Bit

Are you using DelphiJunk 0.1b or DelphiAutoJunk 1.1?

Try recompiling the project with Delphi7.

I am on Win 7 Ultimate 64 bit too, and both versions execute without changing anything. Odd.... If recompile doesn't help, let me know.

Madara-Uchiha - October 15, 2013, 11:09 am

Delphi7 throws an EOutlineError when trying to compile.

I used Delphi 7 and DelphiJunk 1.01b

Any ideas?

Hey,

Thanks for updating but I am really sorry that I need to tell you its still not working.

Look at this:
