Spoiler ([Click to View](#))

1. Can you guarantee a number 1 spot on Google or other search engines?

Unfortunately i cannot guarantee that. Because search engines are very unpredictable systems and they rank your site based on hundreds of factors.

But the most important thing is the competition of your niche. If you have a low-competition niche, then the chances of getting

rank 1 on search engines are higher, than if you have a high-competition niche.

Overall my services has proven to show positive results, no matter what your niche or competition is.

2. In what form are these backlinks?

The backlinks from PR1-PR4 sites are in form of Forum Profiles, Web 2.0 Profiles, Wikis, Social Media Sites, Etc..

The backlinks on .EDU and .GOV sites are in form of blog comments

The backlinks on PR9 sites are in form Web 2.0 Properties and Profiles

3. How much guaranteed traffic will i get?

[size=small]You will get around 150-250 visitors daily for the duration thats included in your package. The traffic is 100% real organic search engine traffic, from Google, Bing, Yahoo... all based on your keywords.

Inb4 the haters try to swim at me, I work for an SEO company for over two years, I know what I am talking about. It's the so called real SEO. Its more than backlinks, trust me guys.

People who buy this are simply throwing out their money. I don't want to be disrespectful but thats not real SEO. Stuff like this worked 4 years ago, Google got smarter. The best you can get out of this is a google penalty.

Since the penguin update, Google looks at backlinks a lot more critically. They accept natural link building, but 400 backlinks in under a month, doesn't seem natural. Its pure shit, Google will notice.

Next, Social Bookmarks are outdated.

Pings and Webdirectories are the fastest way to get yourself a penalty.

I don't even want to start about the high PR Links.

Guys, this service is counterproductive for your website.

Guys, this service is counterproductive for your website.

I have also worked actively with SEO for the last 2 years, and my services and techniques has proven to work perfectly well with any sites of any competition niche.

And i dont offer JUST backlinks, as you can read there are several methods used here, backlinks one of them, including social bookmarks, pings, indexing and also traffic.

I started providing this service a good while after the penguin/panda updates because i was practicing my services

to make sure its abosulely safe to use and that search engines wont penalize your site.

Pings and premium indexing services that i use, are one of the best ways to index the new backlinks that has been made

to your site, so you obviously dont know what you are talking about.

I dont ping the website directly, i ping the backlinks and bookmarks that has been made

i can show you proof of several websites that have used my SEO and have achieved great rankings and results.

So gtfo with your "SEO Company Experience" and stop sales thrashing.
