Indeed I shall after school perhaps. Thank you very much (:

Santa_coder - September 28, 2013, 12:13 pm

Spoiler ([Click to View](#)) (Sep 26, 2013 08:20 PM)r e f l e x Wrote: [\[CITE\]](#) Thanks for reading my thread. There is a specific reason I posted this thread.

It is so that way people who are in distress in choosing a computer security combination, these are the 4 of the best,

it makes it difficult for hackers to attain your information initially with Comodo Firewall, then with MalwareBytes Anti-Malware PRO and SUPERAnti-Spyware Professional scanning objects and files have never

been more intricate before.

Now your mainline of defense after those secondaries is ESET NoDoors 32, (personally I believe that firewalls do work in [Tandem](#)). This is truly the final stand & ultimate line of computer

defense in regards to local security - people will post in my thread "OH BUT YOU FORGOT THIS AND THAT!"

No, this only covers Anti: Spyware, Malware, Viruses and Firewalls. In this thread we will go over why these

are the best for your computer's security and your personal safety & I hope you enjoy:

NOTE ALL PRODUCTS ON THIS PAGE ARE WORTH THE PRICE THEY ARE SOLD AT. ITS 70\$ VERSUS YOUR COMPUTER.

Thanks for reading my thread. There is a specific reason I posted this thread.

The best of the BEST:

[ESET NoDoors Anti-Virus 32 \(paid version\)](#)

[Comodo Firewall \(free\)](#)

[MalwareBytes Anti-Malware \(Pro is suggested\)](#)

[SUPERAnti-Spyware Professional \(Professional paid is suggested\)](#)

These all cover different aspects of computer security such as Anti-Malware, Anti-Virus, Anti-Spyware and a complex Firewall. Of course, paid versions & registered versions are always highly recommended for use rather than unpaid - it is only to your advantage <3

Anti-Virus Software

Anti-virus software scans a computer's memory and disk drives for viruses. If it finds a virus, the application informs the user and may clean, delete, or quarantine any files, directories, or disks affected by the malicious code.

ESET NOD32 is the best Anti-Virus precisely because of:

Easy to use interface, very friendly.

Updates constantly.

Potentially the most efficient real-time file-system protection.

The fewest amount of false positives detected ever**

Has the most advanced scanning heuristics.

Consumes very few system resources (energy, battery) in comparison to Kaspersky, Avira, Avast, AVG... you name it. etc...

Trust me, I've used them all - this one is by far champion.

Has advanced options for users in case.

Anti-Malware Software

Although Malware is a generic term used to describe malicious software such as viruses, Trojan horses, spyware, and malicious active content can be removed via Anti-Malware Software.

MalwareBytes Anti-Malware PRO is the best Anti-Malware because of:Extremely simple interface.

Precise, daily updates.

High scan detection rates.

Realtime file protection and web protection/

Made to scan for malware specifically if it was not obvious enough.

Are little to few on the market as a secondary line of defense on your PC.

[img]<http://www.trinitysoftwaredistribution.com/mm5/graphics/001/MalwareBytes-PRO-1-User-Retail-Download.jpg>[/img]

Anti-Spyware Software

Anti-Spyware targets a wide range of unwanted programs that exploit infected computers for commercial gain. Spyware itself can deliver unsolicited pop-up advertisements, steal personal information (including financial information such as credit card numbers), monitor web-browsing activity for marketing purposes, or route HTTP requests to advertising sites.

SUPERAnti-Spyware Free Edition is the best Anti-Spyware because of:

SUPERAntiSpyware is very easy to

use

Extremely high detection rate

Does not use too many system resources

Overall preferred than SpyBot for that exact reason above

Updates are set to whenever the user would like

Stable & Noteworthy & Trustworthy

[img]<http://img153.imageshack.us/img153/5076/boitef.jpg>[/img]

Firewall Software

Speaking in general, a firewall prevents computers on a network from communicating directly with external computer systems. A firewall typically consists of a computer that acts as a barrier through which all information passing between the networks and the external systems must travel. The firewall software analyzes information passing between the two and rejects it if it does not conform to pre-configured rules.

Comodo Firewall is the best Firewall Software because of:

Being one of the best, strongest Firewalls to penetrate.

Extremely advanced protection system.

Better than Zone Alarm.

Extremely simple graphical user interface.

Advanced settings give the user many options on the table regarding exceptions.

Does not consume resources.

However, it does install additional software which I recommend you uninstall after complete installation.

This software is worth it, because it is free and gives the user absolute control over their PC.

[img]<http://www3.pcmag.com/media/images/311913-comodo-firewall-2013-main-window.jpg>[/img]

why do we pay for virous protection wen microsoft made a year winer protector

link: [Microsoft virous](#) (only windows)?

SIM-1980240 - September 28, 2013, 12:45 pm

ESET has been the only thing picking up my bots lately. :/

Dr41DeY - September 29, 2013, 5:20 am

Thanks for sharing this with us! :D

Good thread.

T e s s e r a c t - September 29, 2013, 8:43 am

Your welcome all, and ESET knows exactly what its doing, that is precisely why its the best. That is enough proof right there! The heuristics built in are phenomenal. Please spread the word, I really want people to have safe computers and this is the main reason why.

(Sep 28, 2013 12:13 PM)Santa_coder Wrote: [\[CITE\]](#) why do we pay for virous protection wen microsoft made a year winer protector

link: [Microsoft virous](#) (only windows)?

We pay for virus protection because:It is better, more reliable and cutting edge than freeware anti-virus.

Only amateurs rely on freeware for an anti-virus

Microsoft has a horrendous heuristics database which does not get as much attention as a company which specializes in anti-virus protection.

blazer4213 - October 5, 2013, 5:07 pm

I prefer bullguard over all of these antivirus programs

GenericSkid - October 5, 2013, 6:20 pm

Great thread! Dealt with a couple of things Webroot couldn't seem to handle.

thegamerchunk1 - October 5, 2013, 11:02 pm

pff aint gonna pay for eset nod....making a crack right now
being a grey hat thats all i can be...

TexasBadBoy - October 5, 2013, 11:24 pm

Very good thread. I am going to check them out. Thanks for having this here.

Generals - October 5, 2013, 11:30 pm

i tought bitdefender is better than eset :P .

T e s s e r a c t - October 5, 2013, 11:35 pm

(Oct 5, 2013 11:30 PM)Generals Wrote: [\[CITE\]](#) i tought bitdefender is better than eset :P .
Not necessarily because:

ESET uses less system resources against BitDefender
ESET is 500 Megabytes less than BitDefender
ESET has never had a false positive detection in a very long time
ESET has extremely advanced heuristics
BitDefender has none of these, except for great heuristics as well.

This is why, ESET NoDoors, is bettter. ? ?

Helldembez - October 6, 2013, 3:57 am

Glad to see I made the right decision on choosing COMODO. I recommend to use it, works like a charm.

Zher0 - October 6, 2013, 10:33 am

ESET Sends samples even when you deny them (Rumor i heard from a malware coder).

T e s s e r a c t - October 6, 2013, 10:59 am

(Oct 6, 2013 10:33 AM)Ace - Wrote: [\[CITE\]](#) ESET Sends samples even when you deny them (Rumor i heard from a malware coder).

Speaking from the White Hat perspective (which is mine), I do not mind that they send samples for multiple reasons. It only allows the malware researchers collect malware samples a.k.a. malicious code from quatrain more specifically to research threat techniques and develop defenses against them in the future.

ESET highly encourages (users) into sending of malware samples, and this is why it is in fact one of the best anti-viruses - it has the "upper hand" in detecting of malicious code (with advanced heuristics) and in collecting malicious code to save its consumers whom buy their product from the very threats the consumers wish to avoid. Thus, ESET is one of the best anti-viruses. Sending of samples offends nobody, and benefits system security.

iDiv - October 6, 2013, 6:13 pm

(Oct 6, 2013 10:33 AM)Ace - Wrote: [\[CITE\]](#) ESET Sends samples even when you deny them (Rumor i heard from a malware coder).

If you are purposely dealing with viruses, why even use an anti?

And NOD32 updates at least once a day! :)

Aura - October 6, 2013, 6:18 pm

Psssst ...

Kaspersky > ESET ...

Just sayin' !

Joking, I honestly think Kaspersky and ESET are the best A/Vs around.

FreakyantipSYCHIATRY. - October 8, 2013, 3:19 am

everyone knows avg or norton are the best... eset and kaspersky suck

GenericSkid - October 8, 2013, 6:03 pm

(Oct 8, 2013 03:19 AM)dcigs Wrote: [\[CITE\]](#) everyone knows avg or norton are the best... eset and kaspersky suck

Yes, because AVG never gets butthurt over the slightest things...

uzzapers12345 - October 9, 2013, 12:22 am

how about vipre ?? AVG?? avast?? norton???

Aura - October 9, 2013, 3:32 am

(Oct 9, 2013 12:22 AM)uzzapers12345 Wrote: [\[CITE\]](#) how about vipre ?? AVG?? avast?? norton???

Avast scan time is probably the longest ever.

Norton scans takes all your CPU for some reason to make it go faster, and it doesn't.

AVG isn't that bad I guess. I have the free version of it on my tablet and it does the job. If I had one to pick between those three, I would pick AVG.

Broda - October 9, 2013, 6:10 am

You just listed four of my favourite tools, I highly recommend them!

XuriX - October 9, 2013, 6:39 am

Very nice thread.

Thanks for taking the time to research and share your findings :)

Another really effective tool for removing virus', trojans, malware etc etc is ComboFix.

It can be downloaded from [here](#)

hitincreaser - October 9, 2013, 6:43 am

(Oct 8, 2013 03:19 AM)dcigs Wrote: [\[CITE\]](#) everyone knows avg or norton are the best... eset and kaspersky suck

Norton is very slow. I have has norton on my computer befor and it use to lock up and freeze. I have 16gb ram and a ad 8120 and still locks up. Also i noticed that it did not update that much...

DiDA - October 10, 2013, 3:21 pm

BitDefender is said to be the "Best" but you need a high-end PC to be able to work with it as it takes up too much resources.

NewbHacker62 - October 14, 2013, 4:47 pm

THANK YOU SO MUCH :D THIS HELPED ^.^

Bimjee - October 16, 2013, 4:23 pm

gonna try them out and see how it goes :)

NoobieAF - October 19, 2013, 8:33 am

In my opinion:

BitDefender 2013 > ESET

(Used both before)

Hackerpunk1 - October 21, 2013, 10:12 am

SuperAnti Spyware can be replaced by Emsisoft Anti-Malware

replaced - October 21, 2013, 11:56 am

Kaspersky Pure 3.0 > the competition

Gorgonite - October 21, 2013, 9:34 pm

Great thread sir, I'm sure many members will benefit from this. Are you sure that paid versions are always better? I think that sometimes the upgrade is optional, and not that big of a difference? What do you think?

Tesseract - October 21, 2013, 9:48 pm

(Oct 21, 2013 09:34 PM)Defender Wrote: [\[CITE\]](#) Great thread sir, I'm sure many members will benefit from this. Are you sure that paid versions are always better? I think that sometimes the upgrade is optional, and not that big of a difference? What do you think?
What do I think? Or What do I know?

I know that ESET NOD32 quits updating its database after its 30 day trial.

I know that MalwareBytes does not run active file system protection and malicious IP protection and flash memory scans without the Professional upgrade.

I know that SUPERAntiSpyware does not have the file system protection on as well, and tends to expire and limits the program's features extensively, such as the full extent of a full scan.

Comodo is simply fine ungraded. You literally, get what you pay for in this case.

I have to update this thread with great points I seem to be formulating. Thank you for the constructive responses the 95% of you, others, keep working on it... ;)

yeemun - October 23, 2013, 10:22 pm

great thread, all is the best anti virus , I'm install nod32 since I have bought my laptop , around 5 year , good anti virus ..

Kampenny - October 24, 2013, 2:41 am

<http://chart.av-comparatives.org/chart1.php>

Ben Mitch - October 27, 2013, 3:12 pm

Ahh the ye old question of which is the best anti virus, easy way to do this is use the box mara fix from nsanedown for eset 7 :) then download malwarebytes anti exploit and keep mbar & emisoft emergency scanner handy for extra scanning :) then you'll be alright.

slightly pissed right now so if this post seems abit scrambled then you know why :)

r4z - October 30, 2013, 11:31 am

Vouch for this thread. I use Comodofirewall , and eset nod atm and it works great:)
!also gametheory is a great member! Cheers.

iraq55 - October 31, 2013, 12:53 am

Please, At last
Any program is the best ??

Tesseract - November 7, 2013, 11:21 am

(Oct 31, 2013 12:53 AM)iraq55 Wrote: [\[CITE\]](#) Please, At last
Any program is the best ??

Yes, these are of the top of the line software in computer security. I have updated the thread with a chart from the Virus Bulletin board for proof for the skeptics. Then I added malwarbytes anti-exploit. Post away people (;

- With computer love, Game Theory

LittleBobbyTables - November 7, 2013, 3:46 pm

Thanks for this list man. Was always curious as to what AV to get. Was debating between ESET and Kaspersky.

whitehat123 - November 7, 2013, 3:52 pm

(Oct 6, 2013 06:18 PM)Aur? Wrote: [\[CITE\]](#) Psssst ...

Kaspersky > ESET ...

Just sayin' !

Joking, I honestly think Kaspersky and ESET are the best A/Vs around.

I use Kaspersky but I'll check out eset. Why isn't Kaspersky on

<http://chart.av-comparatives.org/chart1.php?>

caidd44 - November 7, 2013, 9:17 pm

You quoted two different products that perform real-time protection. Would you recommend that run both in real-time protection mode and would this not drastically effect performance?

Tesseract - November 7, 2013, 9:24 pm

(Nov 7, 2013 10:17 PM)caidd44 Wrote: [\[CITE\]](#) You quoted two different products that perform real-time protection. Would you recommend that run both in real-time protection mode and would this not drastically effect performance?

Your statement does not get any more vague does it? One should have each layer of protection. One Antivirus, Anti-Malware, Anti-Spyware and a Firewall & Malwarebytes Anti-Exploitation. Both are not nesscary unless you are a paranoid person or careful person. You sacrifice performance, and I did not recommend anybody do such thing. I said I believe they can work together.

I used Smart Security 7 (best antiviral prevention & simple firewall), MalwareBytes Anti-Malware & Exploit. Simple, sweet, most effective especially with my computing skill. Two Firewalls running in tandem is not recommended for the computingly-weak minded. It is fine for me, therefore, again, I stated I believe they work in tandem. All the user must do is create the proper exceptions for both inbound and outbound connections (;

- With computer love, Game Theory

Austerity - November 8, 2013, 4:16 am

Very nice thread sir, I appreciate all the information.

dabmaster6000 - November 9, 2013, 4:01 pm

this is really funny to me as im a ratter and numerous amounts of my slaves have eset and avg and all these security measure but yet none of them have detected my rat

Tesseract - November 9, 2013, 4:12 pm

(Nov 9, 2013 05:01 PM)flazzid Wrote: [\[CITE\]](#) this is really funny to me as im a ratter and numerous amounts of my slaves have eset and avg and all these security measure but yet none of them have detected my rat

Yeah, guess what lightbriht? I'm changing it up from ESET. Did some personal research. Check back in a bit, and your statement will no longer be valid. ESET is no longer the best. It is BitDefender since ESET has been breached on the AV Chart, and F-secure & McAfee have great heuristics, they just get breached too easily.

romiropi - November 11, 2013, 1:38 pm

Why download all this free version if you can find same fullversion programs cracked or pached at any site or torrent ??

T e s s e r a c t - November 11, 2013, 1:40 pm

(Nov 11, 2013 02:38 PM)romiropi Wrote: [\[CITE\]](#) Why download all this free version if you can find same fullversion programs cracked or pached at any site or torrent ??

Because if you read the rules, discussion of such cotent you described is forbidden on this forum's message board. And free doesn't come with free bootlegged, preprogrammed anonymous code.

CBF1 - November 14, 2013, 12:00 am

Thanks for recommending Bitdefender, it is perfect as a free product!

NigerianLord - November 30, 2013, 9:34 am

Thanks this made my decision a lot easier

passyman121 - December 11, 2013, 11:04 am

nice thread and info ,i,ll be using some of these if they're compatible with windows8...

(Dec 11, 2013 12:04 PM)passyman121 Wrote: [\[CITE\]](#) nice thread and info ,i,ll be using some of these if they're compatible with windows8...

Windows 8 been out for a while now, so all of them should be compatible for Windows 8 as they're really popular softwares.

F793Syncmaster - February 6, 2014, 4:31 am

How i can see bitdefender is no more free, so as theyalso made a new product, named: Bitdefender: Windows 8 Security...

what do you think guys is it better to install Windows 8 Security on windows8 ro still Bitdefender: antivirus plus

b7s - February 10, 2014, 2:28 am

Nice tutorial!nice thread and info. Thank you.

Soccer - February 11, 2014, 4:12 pm

Nice guide, but I do honestly think you should add ESET. Really does catch all the files I make when dealing with malware.

Aura - February 11, 2014, 4:16 pm

(Feb 11, 2014 05:12 PM)Soccer Wrote: [\[CITE\]](#) Nice guide, but I do honestly think you should add ESET. Really does catch all the files I make when dealing with malware.

I think he's looking to expose for the "perfect free protection solution" in this tutorial. You have to pay for ESET Nod32.

Soccer - February 11, 2014, 4:22 pm

(Feb 11, 2014 05:16 PM)Aur? Wrote: [\[CITE\]](#) I think he's looking to expose for the "perfect free protection solution" in this tutorial. You have to pay for ESET Nod32.

There's always a trial that you can check out, then purchasing it. Or I can supply OP with keys

Aura - February 11, 2014, 4:32 pm

(Feb 11, 2014 05:22 PM)Soccer Wrote: [\[CITE\]](#) There's always a trial that you can check out, then purchasing it. Or I can supply OP with keys

Product keys are not allowed on HackForums, come on Soccer, you know that ?

Soccer - February 11, 2014, 4:41 pm

(Feb 11, 2014 05:32 PM)Aur? Wrote: [\[CITE\]](#) Product keys are not allowed on HackForums, come on Soccer, you know that ?

Relax, I never said I will post them at will. I said I can supply them. Not give them out for free.

Aura - February 11, 2014, 4:42 pm

(Feb 11, 2014 05:41 PM)Soccer Wrote: [\[CITE\]](#) Relax, I never said I will post them at will. I said I can supply them. Not give them out for free.

Even there, any kind of product key discussions, sell, trade, etc. isn't allowed on HackForums. I don't want you to get warned.

H3X4G0N - February 11, 2014, 6:15 pm

Thank you very much. I had no idea MB Anti-Exploit existed.

I've also never heard of BitDefender's AV, and your gif says ESET is just as good, so I'm going to stick with ESET. Will keep in mind though if I'm installing on a PC where I can't pirate/etc.

apodictic - February 12, 2014, 5:56 am

Thanks very much for this, both informative and correct.

FIRELIGHT - February 12, 2014, 8:57 am

MalwareBytes Anti-Malware Pro is probably the best out there. I love their side projects and daily updates.

Cont3nt - April 10, 2014, 5:59 pm

Thanks my friend, this has helped me greatly while setting up PC. ?

R.I.P - April 10, 2014, 10:11 pm

Went to install the Spyware software listed. Actually decided to read through their "I Agree" thing, and looked at their privacy policy...:

SuperAntiSpyware shouldn't be on that list. Nowadays it's just an advanced cookie-cleaner.

(Apr 15, 2014 07:25 AM)Messi™ Wrote: [\[CITE\]](#) So, do you think ESET is better than AVAST? I have been debating over the 2 for months.. Please could you give me an answer?

I want one with the highest detection rates and low memory usage.

Thank you.

ESET is one of the best PAID Antivirus there is while Avast! free is one of the best FREE Antivirus there is. You can't compare the both without including them in the paid/free category. If you want the BEST PAID Antivirus with a LOW resources usage, go with ESET. If you want the BEST PAID Antivirus with the HIGHEST detection rate go with Kaspersky. For the best FREE Antivirus, go with either Avast! free or Avira free.

Linkin™ - April 15, 2014, 8:55 am

^ But doesn't ESET still have better detection rates with the free version? And it still has low usage so shouldn't I go with ESET instead of avast? (both free packages)

I don't think ESET have a free package, the "free" package you're talking about is a free 30 days trial, that's it.

In order for Anti-Exploit to work you really need to run as Administrator, just saying.

SourceLoader - April 16, 2014, 6:22 pm

Awesome thread with the information about best anti-malware software and firewalls, atm using now comodo and malwarebytes going use soon nod32.

(Apr 10, 2014 10:16 PM)MaiTriCks Wrote: [\[CITE\]](#) Its not like you are that important, is it? The job gets done is what matters. I'm goal orientated, and this software surpasses it all.

It doesn't matter how important I am. The fact that anti-spyware software spies on me really turns me off to the software, especially since it's doing what it's preventing.

-Hyperion - April 21, 2014, 7:34 am

just curious as to why you chose bit-defender over kaspersky?

T e s s e r a c t - April 21, 2014, 8:25 am

I will address all inquiries and update this thread on my return after school. Since my ub3r status allows me to edit threads, this one needs to be updated in spite of new light. Check back soon. :-)
