Get a phone from [/163CZjT/www.fastcardtech.com](#)

I got the iNew i3000 and it works great!

Also, the battery life is AMAZING for a big screen phone.

You should take a look on Amazon:

They have pretty good devices at low prices

Google is selling the Nexus 4 for \$199 w/o a contract. My Gf bought it after she lost her S3 on vacation and she seems to like it. She downgraded imo, but no complaints from her.

Nexus 4 would be awesome but they ran out of stock fast.
