I so trust you, gonna downlaod it now!

Adamcheek2 - September 27, 2013, 1:27 pm

You are fairly new here, which raises some concerns for me. I'm not downloading it, but if it's clean on your side, thanks for the share!

3nterman234 - September 27, 2013, 2:03 pm

Checking it now; will reply later when tested.

-- EDIT --

It appears not infected. Please post a virus scan of this for further notice...

It also appears that most of the tools were deleted from an antivirus software on OPs PC. Sorry to say, but it doesn't seem very useful except for a few tools.

Dr41DeY - September 27, 2013, 2:05 pm

ConstablePanAm - September 30, 2013, 4:22 pm

(Thanx for the heads-up PhantomElite, didn't know you could click on the rep score)

I won't download on general principle. Apparently you're leaking tools without the authors permission or even giving credit.

To new members, click on the posters rep score and you might not be so quick to download and say thank you.

Bad form dude...bad form.
