Thread: [\[TUT\]Multiple ways to get slaves and farm poeple! \[Easy\]\[Fast\]](#)

Aur3xis - September 28, 2013, 3:38 am

Hi there, few days ago i have found out some methods to "farm people"

below i will explain what that means, and how to, i didnt saw any tutorial on HF so i am making a fresh one, hope you will like it.

What means "farming people"

So lets start with an simple expample, someone said your an noob, and you want to boot him down but you dont have a booter... And you know some one that have one. You simple say to this person that the same guy that calls you a noob sai his mother is a b*tch for example. And the guy want proof, than you just use one of the methods shown below. So what farming ppl basicly is, is that you just "collect" people to do something.

Skype methods

1- Use skype fake quote(not made by me) [\[download\]](#) put the victims skype name in it and something about the person you wanna farm in the message box, and than send it to him/her.

2- Edit the database and, than copy the message and send to the person you wanna farm(Manual skype quote)(can add html tags to it)here is a tutorial how to do it(Not made by me, just found on YT)[Tutorial](#)

3- Fake messages with Photoshop(i didnt find any video, and i alsoo dont have PS on this PC so i won't be able to show it) and send a screenshot to the victim.

Fake hacking

1- Edit a web page on google chrome(F12) change the site name to "victimNAME is a b*tch" for expample make a screen shot and send to the victim(this method is for NOOB victims ;))

2- Send your victim spoofed server file of your rat (spoof to jpg/png and tell him to open it)

Those are in my opinion the best ways to farm people.

Why should i farm ppl?

If someone piss you off and your victim have something you need you can farm him. You can infect your victims that trust you becaus you fake helped them. There are multiple reasons to farm people. I farm people to infect them. Or when i need something and i know my victim have it :)

It took me a lot of time to make this tutorial pleas tell me below what you think about it :)

If you need help with farming or you have problem with the program/tutorial i gave above, feel free to PM and ask for help!

PS: srroy for bad english, its not my mother launguage.

It's actually spelled pharming and this is not pharming.

Aur3xis - September 28, 2013, 8:02 am

pharm and farm is something els

35 chars...

The title should be "How to get slaves".

Aur3xis - September 28, 2013, 8:13 am

Actually your right :) but lot of ppl will think this is another spread tutorial(it kind'a is :D)
