Be more detailed and explain what problem you're facing.

i am using absolute crypter v11.6

i am trying to crypt the server with startup on and i have clicked the options like inject and startup

after crypting .. when i am opening the server in the victip laptop .. the connection is not coming

its a darkcomet rat 5 and xtreme rat server

can you tell me the configuration of it .. and where i am going wrong ?

I don't think it's to do with the crypter.

Have you port forwarded?
