-- All the features have been copied from the official website. The link or name has not been given to prevent noobs from accessing this. However i know around 80% of you already know about it so please dont tell anyone what it is and go ahead :))

File uploaded on: anonfiles[WARNING POSSIBLY INFECTED].pw - Thanks to Chickendipper
VirusTotal: <http://postimg.org/image/uhn48f1bh/>
MalwareBytes: <http://postimg.org/image/5zafzv857/> ?

Edit: While decrypting the code you might get errors. Ignore and continue with the decryption. :)

Decompiler - October 1, 2013, 4:47 am

I will check this out now.

Thanks for sharing,will return with review.

funkydude - October 1, 2013, 4:51 am

Sure :))

I deliberately posted it here instead of the Android Section cause this where most of the hackers check & personally i feel all the hackers who open this section and reply and try to help people are pretty down to earth and dont just start giving negative comments/rep for no reason ..

I hope it is useful to all of you.

There is no chance of Virus as I downloaded a fresh copy and uploaded it directly.

Happy Hacking ?
