Thread: [Not able to view or open \[Reviewed\] threads in eBook Bazaar](#)

EvanC - October 1, 2013, 12:44 pm

Anyone else getting this? It is saying "The specified thread does not exist." whenever I try to click on them.

If anyone knows a solution or fix please let me know

Thanks,

EvanC

They are fine for me. I suggest you try again, as at times Hack Forums has a minor issue like this with threads. If that doesn't work try clearing your cache or waiting a bit. It often resolves itself.

Ok thank you for the reply. I did try doing that, and it didn't work. I also tried my iPhones browser and it didn't work.

It may have been a migration issue with the threads, it seems to do this with all of the [Reviewed] eBooks, not just mine

Oh, that is true. All threads with the [Reviewed] prefix do not work. I think Omniscient may have mad a tiny mistake. I'm sure he will see this and remedy it.

Could this have something to do with the termination of the official reviewers group?

Ok haha thank you very much. I will close the thread.

Oh what the hell. I'll fix it.

EDIT: Oh my lord. Appears that in the transition of moving the threads into the Ebooks the posts didn't get moved. And when I deleted the old Forum it deleted the posts table but not the threads table.

So now I have all the threads but no posts from the Official Reviewed Ebooks.

Ugh. I may have to work from a backup to recover them. This won't be pretty. :(

A fresh start on the ebook section would be nice anyways.

Okay that screw-up is fixed now. Took hours to run all the queries too. :(
