Post some of your projects, hardly anyone is going to hire you if you don't show past work.

I don't have any live sites up that I've designed at the moment, they've all gone down (validusrsp.com / validus718.com / platinumproducts.nw) but I put up my carbonmade and added some screenshots I had of the websites I've built.

Currently working on 3 people's projects.
