Thread: [Cheap / fast seedbox ?](#)

I feel good - October 1, 2013, 9:21 pm

Hi guys

I need faaast seedbox more 1gb port 5-10gb port - 1TB HDD - Unmatred bandwith

I just find 1gb port i need more ?

?

Are you prepared to pay the thousands (if not tens of thousands) of dollars necessary for a 10Gbps upload speed?

I would guess no or else he would of found something easily.

He's probably expecting it for like \$100-\$300 tops.

Can get dual Gbit ports... so you don't need 10Gbit port...

Dell PowerEdge R210 II

1 month

Intel® Xeon® CPU E3-1230@ 3.20GHz

8 GB RAM

No RAID

1 x 1 TB SATA-2

CentOS 6.4

64-bit OS

2x 1 Gbit connection

25 TB Traffic

2 IP Addresses

CD-ROM Drive

SLA: Best Effort

EU: Amsterdam / Rotterdam

<http://www.i3d.net/deals/>

€105/mo.

That's still most likely 1Gbps burst, which won't be sufficient for prolonged seeding. Speaking of which, is the 1Gbps down or up?

Both directions, this isn't no home ISP... doing 20/2. It's a 2G port so 1.5G in/0.5out or 1.5out/0.5in
