Thread: [\[Complexity\] - HackForums Go Mobile - \[iOS / Android?\] // MyBB Mobile Theme?](#)

Designer - October 2, 2013, 11:21 am

Something fun and quick I made, HackForums Go Mobile.
Just a single page, design only. For fun, so enjoy.

Feel free to leave feedback, ratings, whatever you want ;)
Maybe I'll decide to design everything and program it. Not really sure yet + I need a lot of time.

[img]<http://i1.minus.com/iDcvSDkp4oael.png>[/img]

The iPhones mockup are from pixeden.com

Reticulum - October 2, 2013, 11:23 am

This is really nice, I've been waiting for ages for a mobile app for HF. I'm really surprised one hasn't been made yet :/

Kobato - October 2, 2013, 11:24 am

It looks really cool would be awesome if there was a HF App

Superstition - October 2, 2013, 11:43 am

I really like it! If only it was an actual app..

Designer - October 2, 2013, 11:45 am

I could actually design the whole app and program it... If I only had some more time :)
Maybe I'll try to work on the actual in the future, who knows ;)

M?tt - October 2, 2013, 11:47 am

Honestly, I would put the time towards this. I really see a large amount of appreciation coming from Omni if this actually follows through, especially if it looks as sleek and smooth as the image in the OP. Nice work Designer.

?XilluX - October 2, 2013, 11:51 am

Honestly amazing Design, if this would be a real app, I would die for it :P

StarCraft 2 - October 2, 2013, 11:53 am

If you make it for Android I will kiss your ass.

Duffin~ - October 2, 2013, 11:54 am

Looks amazing, would be great if it came out for iPad :O

Designer - October 2, 2013, 12:34 pm

(Oct 2, 2013 11:53 AM)StarCraft 2 Wrote: [\[CITE\]](#) If you make it for Android I will kiss your ass.
If I were to program it I would probably do it for Android first ^.^
Thanks for the feedback so far everyone.

Superstition - October 2, 2013, 1:19 pm

(Oct 2, 2013 12:34 PM)Designer Wrote: [\[CITE\]](#) If I were to program it I would probably do it for Android first ^.^

Thanks for the feedback so far everyone.

Well.. Thats kinda ironic.. The design is on iPhone...

#Reliant - October 2, 2013, 1:21 pm

I would fucking love an HF app, I hope Omniscient gets one made or one is already in the making, I'm on my phone all the time and my fingers are huge so using the main site on my iPhone is a bitch.

Designer - October 2, 2013, 1:26 pm

(Oct 2, 2013 01:19 PM)Cookie Monster™ Wrote: [\[CITE\]](#) Well.. Thats kinda ironic.. The design is on iPhone...

True, but the design wouldn't be different than on Android.

I'm not very familier with programming apps, but I do have some friends with knowledge in Java and C. If I were to program them I would do it with help of them and learn on the way :)

I could've added the design to an Android phone, but the mockup of these iPhones was nice :)

Superstition - October 2, 2013, 1:28 pm

I know, I think it would look good on the android. I was making a small joke..

Designer - October 2, 2013, 1:37 pm

Yeah, I know ^.^

I might also add one with an Android screen, but people get the idea :)

Keep the feedback coming!

Anal Voyage. - October 2, 2013, 1:50 pm

The menu on the right looks like that FB app.

Werto - October 2, 2013, 1:51 pm

Loving the design!

You should make the app if you have the time. ^^

Nas - October 2, 2013, 1:52 pm

Another great Design from Designer.

Good job. ?

Designer - October 2, 2013, 1:54 pm

(Oct 2, 2013 01:50 PM)Anal Voyage. Wrote: [\[CITE\]](#) The menu on the right looks like that FB app. You are right actually (and I guess you mean the menu on the left).

I did actually want to spice the menu up a little, but for the sake of simplicity I just added a search field and the main menu items in there.

I could add the User CP (with options) to the left and search instead of the user icon on the top right.

Keep the feedback coming, I appreciate all the comments ;)

But it's the image on the right, though. ?

True, true. I thought you meant the right side of the screen :)

I might work on a menu variation when I have time.

In the meantime, feel free to leave more feedback, so I can adapt to the opinions of other members,

DEX_ - *October 2, 2013, 2:31 pm*

Sleek, simple and effective. Love it! I'd definately use it if you were to create the app.

ANTI HERO - *October 2, 2013, 6:07 pm*

too cluttered, try and not just squeeze the website onto a tiny screen

Designer - *October 3, 2013, 8:31 am*

(Oct 2, 2013 06:07 PM)Independent Trucks Wrote: [\[CITE\]](#) too cluttered, try and not just squeeze the website onto a tiny screen

It may look cluttered, bit it is not actually.

The iPhone has a large screen. I just looked at some mobile forum themes on my phone and my design has less things.

You might be right though. Maybe I'll add a screen on 100% top.

Thanks for the comments so far.

SPINTHAT - *October 3, 2013, 11:18 am*

Really creative but could add some more details 10/10 :-P

Mohatu - *October 3, 2013, 1:11 pm*

Apparently there has been a mobile theme in the works for years now.

I'm not sure if Omniscient would be OK with someone profiting off of an app they make if it focuses on HF.

Erwin Schrödinger - *October 3, 2013, 1:12 pm*

Looks very nice! Will you make a version for Apple products?

Designer - October 3, 2013, 1:58 pm

If I were to code it, it would probably be a mobile mybb theme, instead of an actual app (after thinking about it). An app could work though. It doesn't really focus on HF. I think it would more make it, so it fits HF. Not really sure yet, but it's just an idea / small concept.

An app as in for Android / iOS, might actually not work for this concept, since it's just a 'theme' to be honest. If I ever decide to code this, it would be a free theme, but I'm not really sure how that's going to work yet (so users can use the 'theme' on their mobile devices).

Well, it's kinda late, so I'll leave this right now.

Btw, just so everyone knows. It was never my intention to make this into an actual app / theme / website / whatever, but who knows.. Anything can happen.

Keep the feedback coming ^.^

TheFeroide - October 3, 2013, 3:15 pm

Dude, that looks nice and it would be swag if there was a app for HF.

Designer - October 4, 2013, 1:04 am

Thanks for the nice comment. I appreciate it.

SoldierX - October 4, 2013, 7:30 am

These headings look a bit clustered. Other than this the application UI looks great. ?

Designer - October 4, 2013, 7:33 am

Yeah, I know what you mean. It looks better on 100% though.

Might add a larger version later, when I have time.

Obviously - October 4, 2013, 11:38 am

Wow, I was just thinking about an HF app yesterday. I even stubbornly searched the app store, just in case one already existed. Anyways, I love the design!

Chunked - October 5, 2013, 12:23 am

Looks dope. I'll definitely be using it if you guys release it.

Spending - October 5, 2013, 4:02 am

Looks awesome. Would love if this became a reality. Thumbs up! :D

Unrep - October 5, 2013, 4:15 am

But did you make the icons yourself though?

Designer - October 5, 2013, 4:59 am

(Oct 5, 2013 04:15 AM)Unreputed Wrote: [CITE](#) But did you make the icons yourself though?
The icons on the right were some free icons and the menu icon (left side) are just 3 shapes. Didn't really want to make my own, as this was just a quick idea :)

Dseko - October 5, 2013, 5:00 am

That would be great if this could be real application.

I would finally surf on HF even when I'm not on computer. ?

JAMESY™ - October 5, 2013, 6:46 am

Would definitely use this. Here's hoping someone takes this further!

xxxravexxx - October 5, 2013, 12:47 pm

looks super official 9 out of ten you should fix the white line on the white Iphone

Designer - October 11, 2013, 2:35 pm

This was a quick mockup and could definately use some improvement.
Thanks for the feedback everyone. Keep it coming.

I'm currently quite busy IRL, but once I have a lot of time again (I'm almost always busy) I'll see if I can work on more things.

Handsome Banana - October 11, 2013, 2:56 pm

If the website looked like that on mobile you wouldn't find me off of it xD
Great design

Matt Honest - October 11, 2013, 3:31 pm

Should make a Windows Phone application, I would take the time to learn how to code one if I had the time.

Babnox - December 2, 2013, 8:26 pm

Wow awesome design you should really follow through with this, I think it will turn out very well!

Vandicus - December 3, 2013, 10:58 am

I really like it, looks really well made. I wouldn't mind using that!

Spending - December 3, 2013, 11:00 am

Looks very nice, I wish it would come out so I could use it for my iPhone. Good job Designer, it looks beast<3
