Thread: [My Experience - To Find Female Slaves *sigh*](#)

Lolerbeans12 - October 2, 2013, 5:26 pm

I cannot emphasize the sigh enough....

Let's go through some of the things I've done this week.....

1.) Spamming chat rooms, YouTube, Omegle, about some Justin Bieber live chat.
(Sending to JDB)

2.) Finding girls who recently posted a video on Youtube, and sending them a download link for a video editor.

Via Message, then adding a comment to their video saying I sent them a message.
(Sending to a mix of JDB and binded video editor files.)

3.) I've spammed the living hell out of Omegle, to the point where I finally just got banned. 5-6 Tabs open, using different 'interests', and using ManyCam to basically display a message and link. Different messages included a 'Omegle Man Filter' Which is an 'addon' for Firefox & Chrome (Also stated that IE is incompatible. lol) Also directed potentials to JDB. (Btw, using the 'Omegle Man Filter' works well if you use 'Lesbian' as your interest. ONLY PROBLEM, you don't get girls, you get dudes. Go figure)

So basically after a week of spamming nonstop. (It's literally what I've been doing. All day. All week.)

I've managed to get a grand total of..... drumroll

Two Female Slaves..... ?

(Even worse, one constantly blocks the webcam, and the other one is on long enough to check Facebook.)

So if anyone has any GLORIOUS method that they're willing to help a bro out with, PM me...

I'll be in a corner...

Crying.

You have to find specific ways to target females. PM me and i'll point you in the right general direction.

Lolerbeans12 - October 3, 2013, 4:59 am

Thanks for the PM, and the help!!!!

HatefulPony - October 3, 2013, 5:13 am

Currently I've got 8 female slaves. I prefer quality over quantity. People who are tech savvy, have a significant online presence, writes erotica or has fetishes, etc (trolling them is ALWAYS fun, if you aren't worried about losing them). I'm using a few spreading methods.

It's definitely hard, but if you hit a jackpot (eg vastly seeded targetted torrent, thousands of downloads).. then drumroll you're going to have hundreds at least. PM me if you want to work together - we'll bind both of our rats and spread together.

coolerfarmer - October 3, 2013, 5:39 am

buy an ebook at marketplace! It's very easy to get arround 20 female slaves a hours (no autopilot)!

Truth - October 3, 2013, 5:39 am

You are just wasting your time and effort. Sad.

Meester Plusser - October 3, 2013, 5:45 am

Why dont you just go find a girlfriend what's the point in female slaves

esbarule - October 3, 2013, 5:50 am

hi !

just ask to yourselve "what kind of "exe" file would i accept to launch if i were a woman ?"

....

esba

Lolerbeans12 - October 3, 2013, 6:27 am

@TryAgain I realize I'm wasting time and effort. But there's nothing I can really do about that.

@Kerenza I can't go get a girlfriend. I literally live in the middle of nowhere with no transportation. I'm doomed (for now) to stay in one place.

@Esbarule It's much easier to get someone to use JDB than to download an .exe. Nowadays everything is streamed right into browsers. With no downloading necessary.
10 years ago though, would have been an awesome time to spread rats.

@Coolerfarmer Broke yo.

@HatefulPony Why would you want tech savvy girls anyways? I can't really understand, seeing how I like girls who are dumb as rocks. <3

ultrakd001 - October 3, 2013, 6:35 am

why not binding your server to a Twilight movie or book or in 50 shades of grey shit or in music video or discography of justin bieber? just use your imagination and improvise

Lolerbeans12 - October 3, 2013, 6:46 am

The 50 shits of gray is a great idea. Download the book in pdf format, bind the rat, and off you go!

Better yet, don't download the book. Just stuff the rat to an appropriate file size. Name it... [50 Shits of Grey Desktop Reader Setup.exe]

EDIT: You know what, I think the biggest problem is finding females somewhere on the web. (Youtube/Tumblr/Instagram/Facebook those are a given.)

Maybe I'm just over-thinking. lol

May be am i from "old school" ;-) but take a look about my threads on this forum and you'll see i have given hundreds of slaves away...and all caught with exe files....

The only think to do is to "think as the potential victim do", bind your server with a "top downloaded" real file, crypt it, upload it...and then sit back and relax with a cold bottle of beer and wait... ;-) it's pretty like fishing ;-)

I'm sure JDB can be fine too but not really tried yet ..

have fun !

I guess you can say, I'm fishing for the big ones. :D

JDB or EXE I'm still looking for a good way to catch those females.

?ain - October 3, 2013, 4:55 pm

Say its a game based on that Justin Beiber/One Direction/Some other boy band movie.

Works loads, you just have to use a bit of Social Engineering.

/Jigsaw/ - October 3, 2013, 5:49 pm

I don't see why you would need a female slave.... Did anyone else read the article about that one guy from here who 'Trolled' females?

tl;dr the time and effort OP is putting into, basically, virtually raping these women, he could invest into a girlfriend that he wouldn't need to abuse.

10/10 OP.

LOL Made my day. <3

If I could virtually rape any harder; I would.

alexcarter - October 6, 2013, 11:35 am

take a break... and start fresh..try thinking like a female ;)

Indexu - October 6, 2013, 12:08 pm

This thread made me cringe so hard. My sides are in orbit.

Plurkie1234 - October 7, 2013, 1:49 pm

Maybe take a break from your computer and spend some time to meet girls in real life?

Mclovinyooven - October 7, 2013, 3:29 pm

Hmmmm, go on omegle and stuff although you've already said that not too sure.... just facebook some shit

spinnerwingnut - *October 7, 2013, 10:27 pm*

pintrest and tumblr and ask.fm.. oh my!

Vitiate - *October 7, 2013, 10:31 pm*

This is simply... Pathetic; you've given a new low to look for in people, congratulations.

Lolerbeans12 - *October 8, 2013, 10:05 am*

Achieving new lows is what I'm best at.

Also, Spinnerwingnut mentioned 'ask.fm'

Before you posted that, I actually got my feet wet in it.

Google search [site:ask.fm "ENTER GIRLS NAME HERE" "1 hour ago"]

Search that without brackets, and just spam the living hell out of it.

Spammed at least 100 pages, got a few clicks. Which is not bad seeing how it took a minute to spam those pages.

"click, ctrl+v, click, ctrl+w" repeat
