Thread: [Skype Social Network \[FOR SALE\]](#)

Kansas - October 5, 2013, 4:59 pm

I have a skype social network for sale, it was for a customer but he backed out at the last second. I don't know why. Anyways its up at <http://gcorner.co.nf/>

proof - <http://gcorner.co.nf/proof.txt>

You can login using the username - usernull / password - usernull

Could be used for ewhoring, etc.

Post offers below/pm me/add my skype to talk - kansas.hf

Feel free to make an account and check it out.

Thanks,
George

Features -

Registration System

Login System

Dynamic User Sorting System

Tight Security on all of the scripts

Get requests on the sorting system are un-injectable (you have no idea how long this took to do.)

Comes with free logo

If you wanted anything done to it in order for you to buy it just tell me and we'll discuss something.

Regarding backend support - I can do it, like I stated above you just need to tell me if you want it. In my opinion its really not needed for a website like this, theres not much you can do except maybe banning users (and I don't know why you'd need to do that in all honesty).

This looks interesting, does it bring in any traffic? Is the back-end fully functional?

Traffic is non-existant because I made this for a member of HF and he backed out at the last second, there was nothing I could do about him doing that because it wasn't in my TOS. Kind of a shitty thing to do, but nonetheless..

Correct me if I'm wrong, but essentially this site just lets you add your name, skype account and a little profile, and then it's added to a pool of members who are able to then contact each other through the buttons on your site?

Still selling this, I'll let it go cheap tbh. I just don't want my work to go without use.
