Resolver is working fine, but sometimes it wont get the ip. if you really ned an IP, just ask me on my main account in skype (its on the bot's mood text)

i'll resolve it with a paid resolver

ddos only works for premium members, so get soime points to get 1 free premium day or buy premium

Nice to hear that.

Its work 100% man i like it dont stop pls xd

Thanks.

BTW: bot is updated now and can resolve up to 100 people at once without freezing. Expect some delay when resolving. This is not because of my bot, it's because of the resolver API

loadmi - December 10, 2013, 7:57 am

We currently have some problems. We are using some API's to resolve the people, so its a bit buggy atm. But we're looking into fixing this as soon as possible

That means it cant resolve the ip for the username you entered.

Yes, this is due to the API i use . The owner recently changed his website language to german, so it gives you a german response . I'm going to fix this asap.

(Feb 21, 2014 06:47 PM)Skyla Blue Wrote: [\[CITE\]](#) Edit: Actually I think yours is probably made in either VB or C#, commands seemed too similar, so that's why I assumed you were using my source. Good for noticing.

(Feb 21, 2014 06:48 PM)Shad?w Wrote: [\[CITE\]](#) He's right and I can see that when playing around with your bot.

You're making money from his source man without even giving him credit, that's really not cool.

Your a fucking idiot. Skyla's bot is written in Python, LoadMi's is in vb.net, I have seen LoadMi's and I know he wrote it all.

loadmi - February 21, 2014, 11:47 pm

I can confirm that. Its fully coded by me in VB 2010.

jojer7 - February 22, 2014, 12:18 pm

Really good job mate, its just awesome

Just a question, should the bot accept the invitation to receive commands? because it still trying to send the message here

loadmi - April 1, 2014, 9:56 am

It does automaticly accept you if you send a friend request

?Chief Keef. - April 5, 2014, 9:38 am

I really like your bot! Skype resolver is quite accurate and responding time is reasonably fast :)

digordi - April 5, 2014, 11:59 am

awesome bot , hope to see more of thesss

Sonic Stacks - April 5, 2014, 12:17 pm

Add the bot on Skype. It will automatically accept you. He's said this already. For additional request for the bot requires purchasing premium. If you are looking for just resolving then this is the bot for you! Great work on the bot. Very well done.
