Thread: [Index of Virus Scanner with no samples distribute](#)

jakoozie - October 5, 2013, 5:48 pm

Hey,

This is my first thread, and my idea is provide a index with Online Virus Scanner with no samples distribute and other informations :).

NoDistribute - 5 free daily scans - Starts at \$1,97/Monthly 8000 Scans or \$1,97 for 2000 credits, one scan = 10 credits, credits never expire - 35 AV (<http://nodistribute.com>)

Chk4me - 5 free daily scans - 150 scans monthly if you create an account, is FREE - 26 AV (<http://chk4me.com>)

Malwr - Unlimited scans I guess - You can create an account to save results/links - 48 AV (<https://malwr.com>) - DON'T CHECK "Share the sample"

RazorScanner - 1 free daily scan - Can anyone tell me? :) - 41 AV (<http://razorscanner.com>)

BlackShades Scanner - 2 free daily scans - \$10/monthly unlimited scans - 37 AV (<http://bshades.eu/scannerinfo.php>)

Element Scanner - 2 free daily scans - \$15/monthly or \$100/year - 34 AV(<http://elementscanner.com>)

Need account - Don't need account

If you know others says for I add.

Thanks and sorry for my English ;)

T e s s e r a c t - October 5, 2013, 5:53 pm

Descent first post! Your taking some initiative here. In addition to your post, www.virustotal.com and www.malwr.com are excellent free file scanners that have heuristics that are magnificent - malwr.com detects if the file makes connections outbound as well.

KyleWTF - October 5, 2013, 5:55 pm

I think the idea is that we want non-distributing sites to scan on.. xD

jakoozie - October 5, 2013, 6:05 pm

Thanks ;) I add malwr but not the virustotal because it send samples. :)

Antoninus - October 5, 2013, 7:23 pm

Malwr distributes samples. Element scanner is \$15 a month or \$100 a year, and element scanner has 34 AV's.

jakoozie - October 6, 2013, 2:56 am

Edited, Thanks! Malwr distribute samples if you check the "Share Sample".

Hedwig - October 14, 2013, 12:24 pm

<http://scan.majyx.net/> I do believe that this now requires sign up.

I think that bshades is unlimited free scans with sign up, they may have changed their terms, but that is what it says for me.

Yoshikage Kira - October 14, 2013, 7:02 pm

(Oct 5, 2013 06:05 PM)jakoozie Wrote: [\[CITE\]](#) Thanks ;) I add malwr but not the virustotal because it send samples. :)malwr uses the virustotal api I think, and if you check "Share Sample" it won't scan it at all.

Cyprella - October 15, 2013, 1:09 am

Thanks!! Add Majyx and I think that it's a complete list!

StuffIsKewl - December 7, 2013, 4:26 pm

Thanks. I never knew about malwr.com Thanks!

Yoshikage Kira - December 7, 2013, 5:59 pm

(Oct 6, 2013 02:56 AM)jakoozie Wrote: [\[CITE\]](#) Edited, Thanks! Malwr distribute samples if you check the "Share Sample".malwr.com doesn't scan your file if you check the "do not share sample"

clawtionary - December 7, 2013, 6:40 pm

razorscanner Is a good One 52 AV's and is made by Razor On HF.

HarveySpecter - December 7, 2013, 6:45 pm

thank you for posting this was a big help.

kafrakos - September 9, 2014, 9:21 am

scan.majyx.net is good or not ? [just asking to be sure]

Solomon Grundy - September 9, 2014, 10:52 am

Chk4me is a messed up site with fake scan result

iHasSlowInternet - March 22, 2015, 2:21 am

Thanks! Just what I needed. Though knew about most of the sites you mentioned. lol

RootBite - May 29, 2015, 7:56 am

I use Majyx all the time.

Osiris1717 - May 29, 2015, 11:39 am

Very useful, thank-you for the share.

jfcnumberone - May 5, 2016, 11:15 am

all of these scanners fail with java files, except malwr scanner. And i did not share but it still does some stuff.

Anyone know a do no not distribute scanner that actually works with jar files?

nullphreak - July 4, 2016, 12:41 pm

Thank you for the post very informative should help alot of people.

raghavsood999 - April 16, 2017, 10:33 pm

I would like to know how to code my own scanner for AV detection my split files. What i want to do is want my own AV to detect the signatures inside the split peices of an executable file then change the hex to fud the file. After rejoin the whole exe and send it to the client. I want to know what is the differance between an offline scanner and an online one? Can you outline the main differance. If it's possible please can you tell me how to integrate other av's in your scanner. The reason you would do that is because you want to fud your trojan to other AV'S not only 1. You know how one guy said elementscanner has 43 AV'S but there are many out there. So would it be possible to integrate all av engines in one program that i make in delphi 7?

I am delphi coder. I want to know if you can download an AV database archive and put all sigs in your scanner.

That split and hex edit method is over rated, its actually not that effective to say the least. Ive done experimenting with it.

If your virus scanner isnt offline than it has a database that updates for virus definitions like your AV software, although I think most do use the internet even if its inside the GUI. Not much a difference in my opinion.

Aegis crypter is free if you don't want to buy a good crypter or cannot afford it. I think results will be at least as good as you might manage to get through your hex editing. Probably a lot more.

And not to rain on your parade but you still need a database like these online scanners use to get your scanner to detect malware. So I do not see you separating your own scanner from an online database of some kind.

I could be wrong but that's my advice.

Inf1ni7y - August 27, 2017, 1:10 am

Don't scan on Nodistribute.com or your file will be distributed to EsetNod32 or other antivirus company!!!

I have created a my own stub, i have uploded it to NoDistribute.com, 2 detect.

Now when i rescan will be detect by 28!

DON'T SCAN ON IT

and sorry for the bad english... shish

Show the proof, post the outputs. I've created a simple .net downloader and scanned on NoDist with no more or less detections(couple weeks) BEFORE it was published.

You Need Luck Son - November 21, 2017, 2:08 pm

can we get an update here please?

PerfectStorm - November 24, 2017, 1:49 pm
