I would like to start off by saying... This anime was absolutely horrible, If you haven't watched this yet consider yourself lucky (unless of course your into the sort of anime where boobs get sucked for power)

[Possible spoilers]

I saw a picture of this cool looking anime guy he was holding a scythe and had blood marked on his face, I was just thinking "That Anime looks awesome! i think I'll watch it tomorrow" sigh i wish i didn't, the Anime starts off well enough but once the first battle scene comes its a bit weird. The guy with the scythe is running low on "soma" (boob juice) and is about to get owned by this masked person. BAM some lady that was shown tending to a garden earlier in the episode comes down and lets the guy with the scythe suck her tits for soma!! The masked lady is then easily defeated by the dude with the scythe (Qwaser). i don't remember much else because there was mostly tit but the next battle scene in episode 2 escalates.. a lot, this time the masked person turns out to be the MC's Best Friend then 2 seconds later her tits are being sucked. Qwaser comes in and sucks his slaves tits then they start battling. Still not turned off? how about the fact that the masked lady's tits were being sucked and abused by some lady. sorry but that's just fucked to the core.

Just my opinion on the events, i probably missed out alot but its kind of hard to remember when tits and boobsucking 13yr olds were prancing around in your face. Arigato

I watched this anime a few years ago too and I really don't remember anything about it either. I can remember only the boob sucking, the main character and the little Lolita chick with the copper puppet... thingy, battle weapon. I think the Lolita chick sucked boobs too or something. All I really liked was the boob sucking and the action scene; other than that, this anime is trash.

I thought it wasn't bad... It had a lot of action and even more boobs. I guess boobs and action just are not your thing...
