Thread: [Why does 80% of my leads are INDIAN leads?](#)

ofirbux - October 11, 2013, 5:02 am

Seriously , it's awful , 80% of my leads coming from INDIA , each lead is 0.05 \$, im on Fil e-I ce ..

Its stupid!

So far This month (1-11 OCT) i got 204 clicks 15 leads \$5.35.

HAHA you just made my day with that remark

?

I know right. French/Aussie/Netherlands are good.

Maybe it's because India has the second biggest population, (can be assumed as the first; as China has A LOT of old people. The ratio from old people is like 2:1, due to the fact of the 1 child rule).

?????I??? - October 11, 2013, 12:27 pm

It has nothing to do with the PPD site you're registered in, it's rather you niche/keyword that is to be blamed.

Hubert - October 11, 2013, 4:50 pm

It's not the CPA/PPD companies fault you're targeting people from India

It's the type of keywords your SEO'ing. Try to change up the words.

Try harder. It doesn't go in one-two-three. It takes time

ppdrews - November 1, 2013, 1:57 pm

Te problem os in your niche . It seems to be searched a lot from indian users

Try to change it ,and you'll see the results :)

IndeXer - November 1, 2013, 3:05 pm

You are purely targeting people from India, if you think it's a problem with fileice and join adnooka and optimize offers and remove offers from India.

Priceless haha.

OP: Lots of experienced Survey-Fillers are using Indian VPN's, the surveys are easier to complete there. Try to filter some of them out, see if it helps.

D?ath - November 5, 2013, 3:11 pm

what are you using for your ppd provider?

Kansas - November 6, 2013, 8:56 am

It's because your traffic is from India, hence you're getting Indian leads. But 5 cents for a lead, that's a joke honestly, I'd change.
