Thread: [TINY CHAT captcha](#)

hackit1 - October 11, 2013, 5:20 am

We are rolling out captcha support to stop spam.

HELLO CAN ANY ONE BYPASS captcha ON TINY CHAT any hack out there or prgrames please , or can it even be done be done?

sniper_x3 - October 11, 2013, 12:47 pm

There is a way to bypass it, if it hasnt been switched on from the privacy settings .

thebigderp - October 11, 2013, 3:47 pm

only way is if they turn it off for their room but that is pointless because if u start spamming they just turn it on

sniper_x3 - October 11, 2013, 3:51 pm

even if they have it off all the available spammers that people are using won't work but they have added a unique key verification to make sure its not a bot or something like that the spammer can only spam if he somehow manage to get his user sig. which he further utilises to get the key and then call the cauth command with right key.

TheCl0wnhelper - October 13, 2013, 12:28 pm

Hey sniper, how does one find that stuff out? Also, do you think tinychat will find a way to stop NiggaBot or will they just let niggabot stay because its really just harmless imo. Like they could find a way to stop the bot from getting the op hashes?

sniper_x3 - October 13, 2013, 1:22 pm

They can actually stop the niggabot or my bot or any other similar bot from getting op hashes automatically if they somehow put a captcha while logging in but if they do that i'll make certain changes in my bot so i can put op hashes in it manually ;)

Also, i have tested it and it worked thats why i said it but i am facing some issues like the bot fails to call the privmsg command even after calling the cauth command you can always find out such things with wireshark or wpe pro or something similar .

TheCl0wnhelper - October 13, 2013, 2:29 pm

Oh ok, yeah I thought it might have been Wireshark. Sniper, I'm really curious though how exactly you find the hashes of the operator, and does it change everytime? Also, what other things will your bot differentiate from Noto's, and will it go on sale or released?

Thanks again, Sniper.

sniper_x3 - October 13, 2013, 2:37 pm

(Oct 13, 2013 02:29 PM)TheCl0wnhelper Wrote: [\[CITE\]](#) Oh ok, yeah I thought it might have been Wireshark. Its not even near completion so I haven't thought about selling it as of now but idk I'll probably keep it for personal use instead of giving out for free or selling it . I will post a screenie of it in a bit so you can see I keep making changes in it everyday lol and I'll let you figure out how to get op hashes its not really that difficult :)

Thanks again. Yes that is autoop hash . ?

Nøtøriøus - October 15, 2013, 1:56 am

Nice rip off of my GUI. The captcha is basically an elevation packet, the packet title is "cauth". Already had my go at it, had a bypass but then they switched to solvemedia.

sniper_x3 - October 15, 2013, 2:04 am

(Oct 15, 2013 01:56 AM)Nøtøriøus Wrote: [\[CITE\]](#) Nice rip off of my GUI. The captcha is basically an elevation packet, the packet title is "cauth". Already had my go at it, had a bypass but then they switched to solvemedia.

Oh if you think so i'll try to do something unique so it doesnt look alike lol
but cauth packet still works if they dont have captcha suppoet enabled in privacy settings. But isnt that great no more annoying spams ? xD

Nøtøriøus - October 15, 2013, 2:38 am

(Oct 15, 2013 02:04 AM)sniper_x3 Wrote: [\[CITE\]](#) Oh if you think so i'll try to do something unique so it doesnt look alike lol

So i walked into a bar with an exploit, and i was like...sup?

sniper_x3 - October 15, 2013, 2:47 am

(Oct 15, 2013 02:38 AM)Nøtøriøus Wrote: [\[CITE\]](#) You talk as if I wasn't aware of that. My method gave me cauth key for any room, captcha or not. But new ad bot will have have decaptcha and deathbycaptcha support. No more annoying spam what?

oh new adbot with decaptcha and deathbycaptcha support good to hear that mate :)
I meant like tinychat is spam free no need to put a room password on and stuff like that i used to find spams really annoying xD

Nøtøriøus - October 15, 2013, 2:58 am

(Oct 15, 2013 02:47 AM)sniper_x3 Wrote: [\[CITE\]](#) oh new adbot with decaptcha and deathbycaptcha support good to hear that mate :)

Wuuut is lyff smh how come im not aware of such exploit lol but good job man even im going to try my luck on it im bored as fuck now lets see if i can find this bug whatever it is :P

Austin009 - October 15, 2013, 9:06 am

some one got tinytool with proxy ? like the fake viwers ... pm about that ..i will pay (:

TheCl0wnhelper - October 15, 2013, 12:58 pm

(Oct 15, 2013 02:58 AM)Nøtøriøus Wrote: [\[CITE\]](#) I have a password bypass sploit. Lolz though.
Noto, is there a way to get passed solvmedia or is the only way deathbycaptcha or some other solving software?

thebigderp - October 15, 2013, 1:06 pm

the only way is to solve the captcha with a captcha service like deathbycaptcha but wtf who is going to pay 1 cent per solve with those services its not worth it. i aint gonna pay 1 cent every time i need to spam a room that fucking stupid

there is some ways to try and hack the captcha but i checked and solvemedia isnt supported in it

because they change it too often

TheCl0wnhelper - October 15, 2013, 1:11 pm

Another question, do oper hashes change each time? Because if someone had a op hash couldnt' they just get mod of the room?

thebigderp - October 15, 2013, 2:27 pm

oper hashes do change over time its hooked on alot of shit like the date and ur ip address so eventually they dont work nemore

TheCl0wnhelper - October 15, 2013, 2:52 pm

(Oct 15, 2013 02:27 PM)thebigderp Wrote: [\[CITE\]](#) oper hashes do change over time its hooked on alot of shit like the date and ur ip address so eventually they dont work nemore

Ah ok interesting. Thanks for this derp.

Austin009 - October 16, 2013, 12:31 am

some on got tinytool with proxy fake viwers ?

the problem is that if someone even did manage to bypass tinychats captcha they can just easily change to another captcha at any time or they can have like 10 differenet cptchas going

basically there will never be spam again like there was a month ago so stop whining

also as i said proxys are blocked on tinychat now they scan the ports of incoming connections and if proxy ports are open they dont let u come in so proxys are dead to so stop bitching and contribute

something valuable to conversation plz thnks

Vicellus Drum - October 16, 2013, 5:35 pm

tinychat.com/api/captcha/captcha.php?room=tinychat%5E[]&guest_id=[]

api.solvemedia.com/papi/challenge.script?k=[]

POST requests, given they solvemedia only has like 5 possible choices.

Derp. If you get the idea, good job. If you don't... I mentor for \$50/hour <3

the fuck are you talking about 5 possible choices.

solve media is just as diffuclt as recaptcha

u must be thinking of the first captcha they had on the site for like 2 days.

they moved to a new captcha which shows ad captchas sometimes and sometimes shows text captchas and sometimes drop down questions. they wrote the shit to be non-working with captcha services also so idk wtf u are tlaking about

Vicellus Drum - October 16, 2013, 6:16 pm

Falcon is clearly a baws! You don't even know..

strangeclouds - November 23, 2013, 11:34 am

I'm wandering. Why do people even care to spam a chat room? Or even create these bots to spam chat rooms? Your usually making little to no money off your work. It's really an act of sad people with no lives whatsoever. Why not put all this time and effort into something that you can really get paid for. I feel bad for every person on this thread except 1 or 2 people. You all need to find new hobbies.

Timecode - November 25, 2013, 4:18 am

Reading what you typed I can see you lack the capability to research and investigate properly. You are claiming they have a "sad life", yet in my opinion someone who would created an account on a forum just to post a dull post, such as yours and complain, well.. speaks for itself.

lexieslol - November 26, 2013, 10:33 am

this looks like a big chat to me XD joke joke looks cool

theviper69 - December 20, 2014, 12:43 am

Is there way to get the SWF url of the captcha and then solve that manually?

What packets are sent when you solve the captcha hmmm..

I managed to beat the cauth by manually typing the guestid and resolving it each time..pretty lame way but it works.

I found out that some color codes if invalid it won't let you post them.

TechWhizZ199 - December 2, 2015, 5:25 pm

Clown if you want to know how to get the autoop hashes manually and add it in manually to a bot. I recommend you take a look at the prepare_connect sequence in the python tinychat.py base file.

Oh and hey Abhi, I'm just back on HF to see what is going on..

(Dec 20, 2014 01:43 AM)theviper69 Wrote: [\[CITE\]](#) Is there way to get the SWF url of the captcha and then solve that manually?

I found out that some color codes if invalid it won't let you post them.

The captcha cauth is retrieved successfully only after getting the cookie from the recaptcha. The cookie will indicate whether the captcha was solved or not.

As I stated to Clown before, just examining the python tinychat.py file will show you exactly the sequence at which all of this occurs.

Also I'm not sure what you mean by beating the cauth manually by typing in the guest id. Could you give us more information? Thanks.
