Thread: [Annoying Python Install Error](#)

NewbHacker62 - October 11, 2013, 12:35 pm

Hey there, I've recently been watching tutorials on python and it looked interesting so I wanted to install it, when I install the Python 2.7.5 Windows X86-64 Installer from Python.org I always get this error: An error occurred during the installation of assembly'Microsoft.VC90.CRT,version=9.0.21022.8',publicKeyToken="1fc8b3b9a1e18e3b",processorArchitecture="amd64",type="win32". Please refer to Help and Support for more information.

I also recently just re-installed a clean windows.

Specs:

Windows 7 Home Premium

AMD Athlon II P340 Dual-Core Processor 2.20 GHz

3.00 GB RAM

64 BIT operating system

-I also have all my antivirus's turned off. Do you guys know where to find Python help and support page?

Oh look, google found the answer to your problem!

http://answers.microsoft.com/en-us/windows/forum/windows_7-windows_programs/an-error-occured-during-the-installation-of/aaba5338-1c09-470f-ae95-e48f323aca30

Could have just typed it there instead of making a thread ???

I google for the past 20 minutes and couldnt find anything O.O

EDIT: Yeah I checked it out it didnt work :/

Repair your os with the inbuilt windows repair function.

Something may have gotten corrupted when you installed.

Also take a look at this: <http://msdn.microsoft.com/en-us/library/ms235342.aspx>

Did you set it to wumbo?

Try a different version of Python. Or building it from source.
