Did you use the same email you registered with it on HF on gravatar?

You also have to wait a little amount of time till it load.

Also.. I don't think non-upgraded members can use custom avatars.

Nice tutorial, thanks. However, you still cant use full sized avatars. It forces you to crop images rather than using the original dimensions HF limited us too.

You can do it just on 4 steps, but I'm trying to make it long, informative, and HQ.

Anyways, it was made for those people who wants to change their profile picture.

Thanks for your feedback. ?

Thanks for this tutorial. I found it useful as I accidentally deleted my old avatar when trying to change it only to find out I couldn't use the old regular method due to security updates in progress. For those thinking this process seems long or whatever its not. I did it all within 2 minutes.
