Now accepting Bitcoin. Pm me

(Oct 19, 2013 01:25 PM)S?int Wrote: [\[CITE\]](#) Vouch for this SSH Brute force! :)

I received It Immediately via the purchase page and I was able to use it right off the bat.

I must say that the program It self gets the job done extremely fast. specially when scanning IP ranges.

It has a variety of options you could choose from and It Is indeed extremely good.

With this you would be able to either sell Roots or use them yourself.

I myself have rooted over 32 servers with this amazing program and I wouldn't hesitate to purchase this If I was you !

Buy it now while It's cheap It's set up Is extremely easy and the customer support Is genuine !

VOUCH ?

NOTE: I will NOT try to SSH brute an IP for a test for you so please don't ask.

Ghetto~~ - October 14, 2013, 3:37 pm

Wish I had the money to buy this :c

Looks great c:

GLWS

System[X] - October 15, 2013, 2:23 pm

This bruter is the fastest ssh bruter on the market and full of options. Its easy as hell to use. Nothing else is needed to brute ssh accounts. Root ssh to vps and dedis sell for \$10+ depending on the specs so you can very easily make your money back.

A full guide to this tool with images and step by step instructions and some FAQ's will be wrote up later today. This is to ensure you get the most out of the tool.

Price WILL be rising to \$30 after a few more sales. Hurry before it does.

Thanks

Fluxify - October 15, 2013, 2:30 pm

Seems like a nice and interesting program. I wish it was cheaper and I might of bought it. GLWS!

Group - October 15, 2013, 2:37 pm

Welcome to my wishlist, SSH Bruter.

nitoh - October 15, 2013, 3:20 pm

Looks nice ill probably buy like i did with all your previous software but no coupons this time? :)
Glws botha !

MaxiPads889 - October 15, 2013, 4:04 pm

Have talked to him via PM for a day or so before buying, managed to come up with the money.
Very friendly user , Just waiting for my HWID to get activated! :)

Cheers System.

Fafaffy - October 15, 2013, 4:08 pm

The program looks nice, and if it works as flawlessly as you say, easily worth \$20.

However, I may be nitpicking, but I think your sales can do a lot better if you supply a better interface. I won't lie, I jumped straight into the screenshots, and assumed how well you know programming by how the GUI looks.

HerrGee - October 15, 2013, 4:25 pm

Bought it, waiting for a licence key, thanks.

Repentant - October 15, 2013, 4:28 pm

Im going to be purchasing this ! :) Hope this is a great tool ?

Just hit autobuy when you are ready to buy.

Thanks

EDIT: Thread design now done and updated

?lixir - October 16, 2013, 9:33 am

I hate to be that guy, but if you are using a password list it's not a brute attack. It's a dictionary attack.

System[X] - October 16, 2013, 9:37 am

(Oct 16, 2013 09:33 AM)Dr. Caspers Wrote: [\[CITE\]](#) I hate to be that guy, but if you are using a password list it's not a brute attack. It's a dictionary attack.
dictionary attack would be a list of random words ect from a "dictionary method"

This uses a list of passwords that you add. Either way both methods are still brute forcing(brute attacks). Why bother with a dictionary list spending hours on 1 ip when the password could be as simple as test123. Is test123 as dictionary word ? No

Thanks

sle7in - October 16, 2013, 11:42 am

well technically if your testing a list of pre configured passwords then iy kind of is a doctionary attack. but not knocking it. if it worka then I'm all for it will buy later.

HerrGee - October 16, 2013, 12:08 pm

scanner seems to be crashing at times, might be scanning too many ip's' but that shouldn't make it crash.

System[X] - October 16, 2013, 2:18 pm

(Oct 16, 2013 12:08 PM)1792ShadersOfWinning! Wrote: [\[CITE\]](#) scanner seems to be crashing at times, might be scanning too many ip's' but that shouldn't make it crash.

Pm me a screenshot, i scanned over 500k ips for testing and had no problems so far.

Thanks

EDIT: Use the like button for facebook or twitter to receive 20% off the \$30. Get it for \$24

Does this have any method to pick out targets worth brutin? i have a ssh bruter that gets me about 100 logins per hour but usually most of them are for routers or such shit

System[X] - October 18, 2013, 11:10 am

(Oct 17, 2013 12:01 PM)yugurt Wrote: [\[CITE\]](#) Does this have any method to pick out targets worth brutin? i have a ssh bruter that gets me about 100 logins per hour but usually most of them are for routers or such shit

It depends on the range you hit, try finding ranges ffor dedis or vps or even websites. Normally home ips give the router shit. I have cracked loads of vps and a few dedis. 1 dedis is massive and hosts loads of site and ircd's :)

Thanks

nitoh - October 18, 2013, 4:30 pm

Scanner wont get past 9k ip's

MaxiPads889 - October 18, 2013, 8:26 pm

(Oct 18, 2013 04:30 PM)nitoh Wrote: [\[CITE\]](#) Scanner wont get past 9k ip's

Mine doesn't even go past 3k most of the time... sucks :/

System[X] - October 19, 2013, 1:47 am

Quote:Scanner wont get past 9k ip's

Quote:Mine doesn't even go past 3k most of the time... sucks :/

There is no reason why the scanner is be restricting the process. Its strange how it works fine for some but some it halts and different amounts. Its the same scanner used on my RDP bruter just with a different port.

I will make a new function for the ip range process and update asap.

Thanks

EDIT: Ok, i remade the function that generates the list of ip's from the range. Its now 10x faster and also working perfect. Just running a few test now then i will update the tool. All customers will get an email once updated and when you run the tool it will auto update for you.

nitoh - October 19, 2013, 9:26 am

If any of you require a alternate way of gathering ssh logins just use the public rdp scanning script for nmap and edit it in notepad for scanning port 22 instead. works like a dream

System[X] - October 21, 2013, 10:21 am

Im currently working on an update for this. For most people it works perfect but for a small few it seems to halt on the scanner. I think its a problem with the ip range function but I will get it sorted and update it.

Thanks

unknown1x - October 21, 2013, 10:42 am

This is NOT a bruter... this is a dictionary attack.. I'd like my money back please.

nitoh - October 21, 2013, 10:52 am

(Oct 21, 2013 07:39 AM)yugurt Wrote: [\[CITE\]](#) If any of you require a alternate way of gathering ssh logins just use the public rdp scanning script for nmap and edit it in notepad for scanning port 22 instead. works like a dream

U mean this script right???

Spoiler [\(Click to View\)](#)

Ill wait till the update gets released its nice to use the scanner implemented in this software ?

Cakeb\$\$\$ - October 21, 2013, 10:55 am

yep that one. problem is getting some actual good ssh logins. out of maybe 500 cracked ones gotten with that script maybe two are servers rest is just routers

System[X] - October 21, 2013, 12:05 pm

(Oct 21, 2013 10:42 AM)unknown1x Wrote: [\[CITE\]](#) This is NOT a bruter... this is a dictionary attack.. I'd like my money back please.

Define bruter lol

This is a brute forcing tool(ie: bruter)

Thanks

Kelv1n - October 21, 2013, 12:15 pm

does this tool ever give false positives?

also do you accept bitcoin?

unknown1x - October 21, 2013, 12:15 pm

(Oct 21, 2013 12:05 PM)System[X] Wrote: [\[CITE\]](#) Define bruter lol

This is a brute forcing tool(ie: bruter)

Thanks

I replied to your pm, but everyone needs to know the difference.

A Dictionary Attack uses a precompiled userlist and/or password list and tries one or many combinations. You could call it a bruter in that sense, but in a reality, a bruter is usually defined as taking a charset and using it to bruteforce each character out to a certain predefined length. Like taking a number pad lock and going one by one, changing the numbers till you get the right combo. That is what a bruter is, this, is not unfortunately.

System[X] - October 21, 2013, 2:28 pm

Name is ssh bruter(A brute forcing tool) The method does not matter, its still a bruter.

Also in the screenshots you can clearly see it uses a password list. It also says it in the features.

Thanks

EDIT: Also coded a ssh client for this. made in in a new project for testing ect. Just need to add it to the tool and fix the scanner bug then update will be release with the client.

Kelv1n - October 21, 2013, 3:04 pm

do you accept bitcoin payments?

im pmed you and posted earlier but no reply

System[X] - October 22, 2013, 5:08 am

I have purchased this tool and would love some instructions on finding decent IP lists :P

System[X] - October 23, 2013, 12:23 pm

(Oct 23, 2013 01:36 AM)MaxiPads889 Wrote: [\[CITE\]](#) I have purchased this tool and would love some instructions on finding decent IP lists :P

I will write a quick guide up tonight for that :)

There are a few ways.

- 1). Search sites like pastebin to get some ip ranges for ssh
- 2). Use ranges from small hosting company's (maybe ircd hosting).
- 3). Scan ranges from your own website hosting.

There are quite a few good ways but i prefer no.#2 :D

IRCD hosting's are great as they need ssh enabled :)

Thanks

oG Encrypted - October 24, 2013, 7:44 am

I'm going to purchase this today when I get home. Hoping for the best.

n0syst3m - October 24, 2013, 1:52 pm

The scanner is in the process of updating, just taking much longer than I hoped since the issue is
coming from some ips not returning a responce or timing out causing the treads to halt and hang
there.

The scanner is a free part of the tool but there are also many free scanners out there so you can
still use the bruter.

Thanks

Peredur - November 2, 2013, 8:15 am

I'm not telling you how to do your job, so please don't take this the wrong way. But the problems
you are facing with the threads hanging because they do not receive a response, is because you
are not using non-blocking sockets. Also , it would be nice if you set the socket linger to ON and set
0 seconds time to stay in TIME_WAIT faze . That way people won't have problems with the
ephemeral ports being consumed very fast on Windows machines.

Also it would be very user-friendly if you would save the NON- CRACKED ones in a file, so next
time they brute, they wont be cracking the same servers. As you know, there are alot of routers that
respond to whatever password. So when a person uses 100 passwords, they will have 100 junk
cracked servers, all being the same one.

Its just some advice, besides that, nice job. Good luck with your sales!

System[X] - November 2, 2013, 10:06 am

No, the problem is that i use thread-pool. there is no way to close the treads once their used until the job of that thread is done. Its that simple but the process of fixing it is not so simple.

Thanks

Repentant - November 2, 2013, 12:36 pm

People, why dont yall just use Angry IP Scanner? It's a good scanner, I mean do you really need to use the one that Is provided for free on the bruteforcer ? Just use Angry IP Scanner that's what I use and I get GREAT results.

System[X] - November 2, 2013, 2:21 pm

Exactly.

Still selling this bruter, get lots of ROOTS :)

Thanks

Dexter - November 2, 2013, 4:12 pm

System, do you allow reselling of Lisences? I have talked to Maxipads, we are wondering if you allow this.

System[X] - November 2, 2013, 4:15 pm

Sorry, no reselling of your license. If found that you are then the account will be banned.

Thanks

Dexter - November 2, 2013, 4:17 pm

(Nov 2, 2013 04:15 PM)System[X] Wrote: [\[CITE\]](#) Sorry, no reselling of your license. If found that you are then the account will be banned.

Thanks for the answer mate, just to clear things out, Maxipad told me to ask you before we went any further.

NoodleBot™ - November 2, 2013, 10:46 pm

Vouch for this tool, just got my first SSL with it. This is great and very handy. Thanks again for the copy of this. I hope for an update of a scanner similar to RDP BruterX's!

I can provide anyone that has trouble meanwhile with private lists of ip's. PM me.

System[X] - November 3, 2013, 8:02 am

(Nov 2, 2013 10:46 PM)NoodleBot™ Wrote: [\[CITE\]](#) Vouch for this tool, just got my first SSL with it. This is great and very handy. Thanks again for the copy of this. I hope for an update of a scanner similar to RDP BruterX's!

Thanks for the vouch :)

Lots of ppl ask me what they can do with root ssh accounts, well you can do almost anything. If its a dedis or vps then you can get access to every thing, every site, cpanels, ftp, whm, plesks ect. basically with root ssh access you have access to the full system :)

Still selling this bruter, get lots of ROOTS :)

Thanks

SkyRider - November 3, 2013, 9:20 am

replied to your pm :)

Thanks

Ezld726 - November 4, 2013, 10:35 am

It's probably not safe to run this on my own pc? When i ran RDP cracker like 2 years ago, my isp noticed it and sent me a text message.

NoodleBot™ - November 4, 2013, 10:51 am

You should at a minimum know how to protect yourself and internet connection while using this tool. At a minimum use a vpn or chain.

Ezld726 - November 4, 2013, 10:58 am

(Nov 4, 2013 11:51 AM)NoodleBot™ Wrote: [\[CITE\]](#) You should at a minimum know how to protect yourself and internet connection while using this tool. At a minimum use a vpn or chain.

I know how to protect myself when using tools like this, but i didn't realize it was necessary back then. VPN wouldn't really help as your ISP is able to see all the traffic that goes thru. Probably safest way to use this kind of tools is to run them on windows rdp right? That's what i did after getting message from ISP. Anyways i'm pretty interested in this tool right now and might buy it later.

System[X] - November 4, 2013, 11:06 am

(Nov 4, 2013 11:35 AM)Ezld726 Wrote: [\[CITE\]](#) It's probably not safe to run this on my own pc? When i ran RDP cracker like 2 years ago, my isp noticed it and sent me a text message.

I use both RDP Bruter and SSH Bruter on my home computer and scan almost everynight and had no issues regarding my ISP.

Sometimes i do use a vpn and i do have these tools on RDP's also but i still scan on my own computer.

Thanks

Dreamful92 - November 4, 2013, 1:29 pm

Scanned so far over 67k IP's, non root.

And if the list larger more then 40k ip's the bruter is very fucking slow

System[X] - November 4, 2013, 2:01 pm

(Nov 4, 2013 02:29 PM)Dreamful92 Wrote: [\[CITE\]](#) Scanned so far over 67k IP's, non root.

As I have always stated, the success rate depends greatly on your password list and the range you scan.

Also, why would the bruter go slower weather is has 10k or 100k ? It makes no difference. Its multi-threaded so the speed depends on your computer stats.

Ok, so if its that slow that you sated, please explain how you scan 67k IP's in a few hours, you only bought this tool this morning. To me or anyone else that is extremely fucking fast.

Thanks

EDIT: What a moron, close the paypal dispute. this dude is a scammer claiming he did not receive the item even tho the above post with him saying he has scanned over 67k IP's lol.

J?ey - November 4, 2013, 2:48 pm

Keep trying bud and im sure you will get many roots :D

Just so everyone knows, success rate depends on the quality of your password list, not the amount.

Still selling this awesome bruter, just hit that autobuy on the first post :)

Thanks

?Bruno - November 11, 2013, 4:18 am

Amazing products, Good luck with sales.

893249123 - November 11, 2013, 10:09 am

Erm, not trying to sales trash or anything but isn't this like the same thing as SSHAm**** (I stared it out so you people can't get free shit) Anyway if not, my bad. GLWS.

System[X] - November 11, 2013, 10:39 am

(Nov 11, 2013 11:09 AM)JoshMMC Wrote: [\[CITE\]](#) Erm, not trying to sales trash or anything but isn't this like the same thing as SSHAm**** (I stared it out so you people can't get free shit) Anyway if not, my bad. GLWS.

To be honest i have never used it. There are many free ones out there but some are outdated and most are a bash file or console app. This one is a windows form and can do any port and is one of the fastest bruters on the market.

If you want a good and fast bruter then you need to expect to pay for it, mine is extremely cheap compared to some that sell from \$100-\$300 and does only 1 port and is slow as hell.

Thanks

RENDERING - November 11, 2013, 11:02 am

This looks super bad ass, can't wait to get. Geniuses behind it!!!

893249123 - November 11, 2013, 2:02 pm

Ahh, cool I gotcha. Once again. GLWS.

System[X] - November 15, 2013, 11:29 am

I now accept Bitcoin as payment. To buy with bitcoin please pm me. If paying with bitcoins price is only \$20 :)

Thanks

Sammy S2 - November 15, 2013, 11:33 am

Do you accept paypal? Thinking buying this

Still selling the best SSH bruter.

Thanks

Mike Bars - November 17, 2013, 8:32 am

here is a small review of this product..

it is a very basic Layout/GUI

You can load as many passwords as you want (good)

but you can only run 1 username at a time (most of the time root will work)

when you go to the scanner you can choose what port you want default is 22, then you can set up the IP Ranges.

This is a pretty good Feature when it works there is a BUG that sometimes the scanner will STOP checking if the IPs are open or not. usually after 3100+-3500 scans.

there is no STOP button for the scan (sucks because you gotta close the whole program out n re-open it)

the Bruter it self works great it does what it needs to do only problem is once it gets done bruteing or lets say you wanna Abort it, once you do that you have to CLOSE the program out again because there is no way to restart or anything (as far as i can see)

Now i am not sales trashing i am just giving out my HONESTY review

i would rate this 3/5 if a few things get fixed/added it will be 5/5

the speed is 5/5 the speed is great and amazing!

System[X] - November 17, 2013, 10:43 am

Its great to have an honest review :)

3/5 is good but I will get it to 5/5 on the update.

A stop button is already added to the scanner, a reset button after abort on the bruter and a pause button too.

The bug on the scanner is whats holding the release of the update back. I do not want to release the update until that is sorted.

Thanks

Mike Bars - November 17, 2013, 1:38 pm

OK! can't wait for the next update then it will be 5/5!!!! hell maybe even 10/10!

also will you be adding a option where we can load mroe then just one username at a time.

System[X] - November 18, 2013, 1:00 pm

(Nov 17, 2013 02:38 PM)Divination Wrote: [\[CITE\]](#) OK! can't wait for the next update then it will be 5/5!!!! hell maybe even 10/10!

This is a ssh root bruter. Roots always use the username root or admin. I don't see the point of adding an option to add more usernames. If more usernames are added then you are going to end up cracking user accounts and to be honest thats a waste, user accounts you can't do shit with them.

Isn't 5/5 the same as 10/10 ? lol

Thanks

Best? Is that a challenge? If you want I can make one even better :3

System[X] - November 19, 2013, 4:07 pm

(Nov 19, 2013 04:58 PM)Linux. Wrote: [\[CITE\]](#) Best? Is that a challenge? If you want I can make one even better :3

When i say the best SSH bruter on HF, i mean as of now.

If you make 1 better then i will beat that too. I have been coding for around 10 years now and know around 13 different coding languages.

The coding part of the ssh bruter is pretty simple using regex split and sending the info over to ssh via sockets and the scanner uses tcp. the hardest part is getting it altogether and making it fast using threads and delegates. I would be suprised if you actually made one that is faster than this one in a windows form state and not a console app, hundreds of checks per second.

Kinda hard for you to say you can make one better without even trying my tool

To be honest, I don't care if you can make a better one.

Thanks

Peredur - November 19, 2013, 4:16 pm

IF Linux. will do it in Python, it will indeed be faster and better, but it's not the point.

You should add a filter to not output the fucked up ones (e.g. if no output comes from uname)

Linux. - November 20, 2013, 4:25 am

Sh think what you must, api was a bit long been a while since I had programmed in that language. ?

It's a bit different sometimes than Python's language it just takes some learning :P Refreshing memory that's all.

Since you've been programming for 10+ years you must be an adult, and if so then I can't really tell. ???

(Nov 19, 2013 05:16 PM)Peredur Wrote: [\[CITE\]](#) IF Linux. will do it in Python, it will indeed be faster and better, but it's not the point.

mrki636 - November 25, 2013, 10:38 am

I bought before few days SSH BruterX and from my point of view this tool need more repairs. First when he brute he always stop on 5k+ scanned, second he is ultra slow i need wait 1+hour to brute 1k sometimes he is faster but after some times he slows and i dont see difrent between 100 or 500 threads. I dont have slow pc 4 gig ram, quad cpu and 20mbps....so now asking all who have purchased do you have similar experiences

Mike Bars - November 25, 2013, 6:46 pm

systemx got any clue on what a update will be out so the scanner wont stop?

RV880147 - November 26, 2013, 5:00 pm

hey there id like to purchase this please pm asap

n0syst3m - November 29, 2013, 12:25 pm

Still no update? i havent been able to even use this yet :(

use putty, angry ip scanner and bruter, works better

stick to free shit its better

DeMoNSLaYeR23 - November 29, 2013, 2:50 pm

Just Purchased & PMed you Sir. Thanks for providing this great product :)

Mike Bars - December 2, 2013, 3:30 pm

system do you have a est on when a update will be made? it keeps stopping around 3000-3500 IPs.

[(5)] MasK - December 2, 2013, 8:06 pm

This bruter block at 5k+ scanned, repairs this tool, is not working actualy, don't buy it.

Ha Haaa - December 3, 2013, 12:06 am

Are you guys saying the scanner doesn't work but the bruter does?

System[X] - December 3, 2013, 12:10 am

This tool does work for most uses but for a few it does halt. it halts at a random spot for each user, some its 3k and some its 5k. I ran a few test this morning and it does not halt for me at all and this is why its taken so long to update. I can't fix something i cant see, maybe a rewrite of the code will fix it.

Thanks

Ha Haaa - December 3, 2013, 12:13 am

How many roots can you get per day with this software, I don't need an exact number. Like around 20 or around 50

System[X] - December 3, 2013, 8:08 am

(Dec 3, 2013 08:13 AM)mrtornado Wrote: [\[CITE\]](#) How many roots can you get per day with this software, I don't need an exact number. Like around 20 or around 50

Some get 0 and some get 50. it depends on the password list you use. if its a crap list then 0-10, if its a good list then 30-60.

Thanks

Mike Bars - December 3, 2013, 3:27 pm

the Brute and scaner both have the stopping/halting issus.

other then that it is a great scanner i just wish this will be fixed, anooying having to check my vps every 2-3 hours to re-start it

mrtornado - December 3, 2013, 4:08 pm

The tool comes with a basic password list but i do not supply private lists.

Thanks

I am currently rewriting the full code.

I can not find any bug why it freezes at 3k-5k so if I rewrite the full code optimizing it, hopefully this will fix the bug.

Thanks

Mike Bars - December 5, 2013, 2:54 pm

if i allowed you on my vps would that help you at all? (as it has a problem on MY VPS)

System[X] - December 5, 2013, 3:04 pm

(Dec 5, 2013 03:54 PM)Divination Wrote: [\[CITE\]](#) if i allowed you on my vps would that help you at all? (as it has a problem on MY VPS)

Thanks but its fine. i added the tool on my old XP laptop and it did indeed freeze but its very strange, I done a number of test today and it was total random on how many it done before freezing and the time and the same list each time. This makes me believe its the coding even more so an updated code and optimized code should fix this issue.

Thanks

Mike Bars - December 5, 2013, 3:05 pm

got a eta bro not really i can wait

System[X] - December 5, 2013, 3:09 pm

(Dec 5, 2013 04:05 PM)Divination Wrote: [\[CITE\]](#) got a eta bro not really i can wait

No idea atm, its the case of coding it bit by bit and testing it, then code another bit and test it and so on. This will help to find the bug if it is indeed a bug with the process(method) and not the coding.

Its the testing part that takes the time as i test it on a list of 6k each time.

Thanks

I'm over half way re-writing the whole code for this, just a couple of issues to sort out.

Thanks

Cha0 - December 11, 2013, 12:16 am

Please tell me this tool sends a command to a powerful server which will scan and brute and that this doesn't use your own connection...

Otherwise why the hell would a spend money if I can simply use free tools like Nmap to scan & Hydra to brute?

I can do anything you promised in the thread with those 2 tools...

System[X] - December 11, 2013, 12:23 am

Then use them 2 tools :)

I like Nmap but its not really good for beginners. As for Hydra, i can not comment on that as I have never used it.

The main function of this tool is the speed. Its the fastest that I have used in a form rather than a console app. Just look at the screenshots.

Thanks

Cha0 - December 11, 2013, 12:43 am

Oh my god this is a whole new level of skid.

I can't believe people would rather use their own computer to brute with a GUI tool rather than the much more efficient, cheaper and safer (anonymity wise) way; buying a 10 dollar server and using Nmap and Hydra...

These kind of fucking tools are the reason HF is known as a 'skid forum'

System[X] - December 11, 2013, 1:19 am

That is your opinion. No one should use any bruter on there home computer, many of my customers use it on RDP's or a vps just like you would with Hydra. Also many users like a form based tool rather than a command line console app. As for the speed, not just me butr many customers have stated that this tool is the fastest out there.

Just because I code tools and sell them here on HF does not make me a skid... I code my own tools and do not C&P. You have the wrong idea of what a skid is. SSH bruters are not the easiest tool to create, thats why you only see a few here on HF.

Its like any tool, there are paid ones and free ones or cracked ones.

Thanks

Cha0 - December 11, 2013, 1:29 am

(Dec 11, 2013 02:29 AM)At0m1c Wrote: [\[CITE\]](#) You misunderstood. I'm obviously not calling you a skid I'm calling your costumers skids.

There skids because they use a paid tool rather than a free tool ?

Or is it because some use it on there home computer rather than a RDP or vps ?

Anyways i'm not going to argue with you any longer, I respect users opinions and you have stated your but i don't respect calling my customers skids without knowing them, yes some maybe are but that's got nothing to do with this sales thread and totally off topic.

Thanks

Could not even say it better to be honest, show u know how it works by explaining us every detail. Easy to talk shit i know...

mrtornado - December 11, 2013, 8:58 pm

systemx how are you with the re-coding of the tools, because I get a lot of errors, ssh doesn't work more then 10 minutes and when I use the rdp scanner after a while after a few hours I get a .net error when I tried to copy the open hosts. I run windows 7.

Why don't you make the program write all the opened rdps in a file inside the program folder or something like that so we don't loose the work ?

Same thing with the ssh program :)

baobao111 - December 17, 2013, 2:19 am

I have to pay you

Waiting to send the software to me

Thank you

System[X] - December 19, 2013, 11:43 pm

Still selling.

Guys, the update will take a little longer than expected. My wife just had a baby 2 days ago and with Christmas holidays its left me with not that much time but it will get done bit by bit.

Thanks

Mike Bars - December 24, 2013, 11:41 am

ok well i was wondering if it isn't updated in a month if you will allow me to sell my license. so far this program is useless to me becuae of the stopping

Mike Bars - December 28, 2013, 6:03 pm

System it has been awhile..can i sell my Lisnces?

i have no need for this if it can't keep running.

Mike Bars - December 31, 2013, 11:16 am

system not trying to rush you or anything but you haven't really been active on this thread with a update.

i mean if your not going to get it updated no harm done but i would like maybe a discount on one of your other products or maybe i can re-sell my License or something.

n0syst3m - December 31, 2013, 11:26 am

ohhh you can -3 REP me but not reply to any messages or pm's nd shit

System[X] (310)Negative (-3): Take your sales trashing else where...

thx for that, like i give a fuk :)

Reply or learn to code. Useless junk your selling, and i know because i had it.

so people make note, if you buy it and post ANYTHING but good comments you will get that crap neg rep.

U

U

I neg reped you for sales trashing and simply because i don't like you. I used to like you, you used to be cool but then turned sour pretty quick.

For not being bothered about rep you pretty sharped jumped on here to say shit about it, this is not the place to argue about the -rep i gave you.

Thanks

n0syst3m - December 31, 2013, 2:22 pm

ok so my posts now keep getting deleted for some reason

you so called scanner / bruter sucks ass, and dos not work.

Im not sales trashing im speaking about my OWN experience with your so called software

Its free tools mixed with a shitty GUI that does not work

So i buy your software, it doesnt work, not just for me but MANY people and you -rep me for speaking the truth?

You dont know me well enough to comment on " I used to like you, you used to be cool but then turned sour pretty quick."

i pm'd you as MANY has and got nothing but excuses

your software is crap

its not worth shit

get this deleted aswell

- rep me, but atleast ill save ppl money DONNT BUY

im only speaking the truth and your trying to hide your lies

STAY CLEAR

System[X] - January 1, 2014, 5:31 am

There will be an update. Its been busy around christmas and new year so please give me time. Im not just some 16 year old kid that has plenty of time. Im 32 with a wife and 3 kids so please give me some time.

Thanks

Bewbs - January 1, 2014, 5:34 am

Thanks

Update status.

The scanner is in the testing stage ready for release.

This time the scanner is in its own app so that you can run it at the same time as bruting or open multiple windows of thje same tool to scan a few ranges at once.

added "Abort" function.

removed the lists making the tool much smaller window.

writes the open/closed to files, just incase the tool does crash or any unknown reason the lists are saved in file(write to the file as it scans rather than at the end).

set/rename the files from the tool

freezing bug fixed

smoother scanning

The bruting tool is coming along also, will update on the soon.

Thanks

Z0mbie. - January 4, 2014, 5:09 pm

So is the update released or just progress update?

Looking forward to no freezing when I brute.

ThanksAny time estimate on when the update will be released?

System[X] - January 6, 2014, 7:37 am

Scanner is on its final stages of testing then ready for release as soon as i get the bruter recoded, hopefully in the next couple of days.

Here is a screenshot of the new scanner

[img]http://net-auth.net/upload/565g7y5y456.jpg[/img]

with 500 thread it scanned almost 39k ip's in just over an hour so as you can see its still pretty damm fast as a lot smaller :)

The bruter should only take a couple of days to recode and get it ready for release. I will keep you all updated with the progress.

Thanks

Manifest122 - January 6, 2014, 9:23 am

Please change your main Thread where it says "Auto Buy", that the license key is not sent automaticly... Auto Buy is ifs completly automaticly.

System[X] - January 16, 2014, 12:18 am

(Jan 15, 2014 06:54 PM)AntraXoZ Wrote: [\[CITE\]](#) Please change your main Thread where it says "Auto Buy", that the license key is not sent automaticly... Auto Buy is ifs completly automaticly.

It is autobuy in the sense that you buy it then the tool is sent to you auto within minutes of purchasing.

It does require a license key and i do ask for a pm for that, this way it helps protect against scammers. I had it fully automated befor but many users bought it then charged back and i had no way to know who they were, this way i do.

Thanks

System[X] - January 24, 2014, 6:40 pm

Still selling this SSH bruter.

Old customers please pm me for the new scanner that is now fixed, full update will follow in a few days with the auto update but for now just pm me for the scanner.

Thanks
