Hi there,

Do you have any more proof?

Cheers

Xylon - October 17, 2013, 4:52 pm

Yes, contact me and I can arrange a Teamviewer session so you can see yourself.

AlterBlitz - October 18, 2013, 5:01 am

How long will they remain? And How much RAM? Can we host gameservers? And finally your skype? I need answers plz. I might buy it if it's legit.

1.) Will remain as long as you don't use for DDOS/SPAM recieve spamhaus.

2.) upto 32gb RAM

3.) Yes, can host game servers

4.) I don't use Skype.

Check contact, jabber or icq.

furious - October 18, 2013, 7:44 am

Can i add IPs to my package and what do you actually get for \$15? how much is extra ram etc?

Xylon - October 18, 2013, 7:51 am

Yes, you can add IP's on your package. Or just use dyndns to forward ip's.

Add me on jabber or icq, you will get a faster response and answer all your questions.

HerrGee - October 18, 2013, 8:54 am

Added you on jabber for contact. See you

Xylon - October 18, 2013, 9:23 am

Everyone that added me as been added.

I don't want to sound offensive, but it's a good thing you're so cheap, but on the other hand, you're not accepting a payment method which you're able to report a scam, All the payment methods you listed are non refundable.

No Paypal.

you can easily get money exchanged, or use western union with an exchanger would be easiest.

Honey Singh or Neal are trusted exchangers.

I'm selling Highquality Servers, get BTC or Perfectmoney and we can work out a deal.

HexOhm - November 23, 2013, 6:38 am

Ya that won't happen. It's not worth my time to go through the hassle. If you do decide to accept PayPal hmu I want 5 16gb servers

almir1977 - November 24, 2013, 7:25 pm

Well, here is my "business" experience with this asshole so that you know with what kind of shit you are dealing with...

Made a deal with him 2 days ago for 12 cores RDP for 15\$. I asked him about it, he said he has them in the stock and gave me his BTC adress. I paid ASAP and he disappeared for good 24 hours after that.

I contacted him and he said he is on work and will send it s soon as he comes home.

15 hours later, after not getting anything from him, I contacted him again and he replied that he doesn't have 12 cores in stock anymore and offered me 8 cores RDP.

I, of course, rejected that as we made a deal for 12 cores and paid for 12 cores one and told him if he wants to send me 2x8 cores, I'm of course fine with it, it's his mistake not mine but I won't accept anything less than 12 cores. And if he doesn't send rdp that I want refund.

This moron replied then that price for 12 cores is double of what I paid for, lol, and said he won't refund me.

Now, I couldn't give a flying fuck about 0.02 BTC, I have 1000 of that in my wallets but I do give a fuck when some asshole is scamming me with smile and tries to make a fool of me. I swear, I'll make his account to be so reputable here that he won't sell Mercedes for \$1 when I finish with him. I told him that in my last PM and I am telling it here in public, I don't care about btc or rdp anymoe, it's a matter of principles now and we'll deal now on my wary.

Bellow is our PM conversation.

Memory: 2048MB RAM

Internet Port Speed: 1GB/s

BTW, I expect btc to be refunded in maximum 12 hours from this very moment.

No refunds, I have 2 CPU x 8 CORE that I have instock.

If don't want, you agreed to TOS when purchasing.

Give me what I paid for or more than that, certainly not less, and do it asap and I don't need refund.

If you want to give me 2x of 8 cores because you failed to fulfill the 12 cores order that's fine but I don't want less then I paid, you said you had them in stock, I paid for them and that's it.

Price for 12 core is \$30. price ranges depend on specs.

You can use a Paypal to PM/BTC exchanger.

Trusted Exchangers: Neat/HoneySing/SWS

People will try to ruin business with few negative comments.

I have many vouches and been selling for years.

It's upto you if you want to purchase, as you can see my customers are satisfied check my other threads as well.

Randomly hacked servers I have now. I have no time too check all and wont check all.

I have guarantee (Windows Server 2008, Administrator, 100mbs, long lasting)

Potti has same exploit I think, but no not the same.

These are given to one person and that is it. I have plenty of servers each day.

Xylon - January 7, 2014, 6:59 am

Online now :) taking dedicated server orders right meow.

DarK-D3v!L - January 9, 2014, 2:42 am

Sounds good , good luck with sales
I might be interested in the future :)

Touka Kirishima - January 9, 2014, 2:48 am

Wait so is this a Dedicated server or an RDP? Seems like an RDP to me.

Thank you mate.

This is Dedicated Server, RDP = Remote Desktop Protocol, just used too connect to the machine their is also VNC View.

DarK-D3v!L - January 9, 2014, 3:33 am

Is it posible to mine on these RDP/dedi's ? Is it allowed ?

OsteeN - January 9, 2014, 3:35 am

What if the dedi would stop working/shut down or whatever, would I get an new one free of charge if I bought one?

Superstition - January 9, 2014, 3:49 am

Are they cracked or stolen from their rightful paying server admins?

What would happen if they get recovered or shutdown? Do you give us any type of warranty?

Are they actual dedicated servers or are some of them VPSes?

Are we allowed to change the admin password?

Do we pay monthly?

If the questions are positive, I might become a big customer!

Yes you are allowed to mine.

Yes you can change passwords.

No monthly fee, one time payment once.

No warranty as these have been in use for months, will be users fault if it suddenly just gets taken down, use common sense and dont ddos like noobs.

Was about to post the same questions and some more

Are they allow to be used for torrent, like for making a seedbox?

Xylon - January 9, 2014, 4:56 am

You can use these as seedbox as you wish.

I do have high speed RDP's 400mbps for \$40 good for seedbox.

Nature - January 9, 2014, 8:27 am

What about the other questions? You didnt answer them
