Thread: [\[PROGRAM\]Signature Maker](#)

Networkmancer - December 3, 2008, 6:22 pm

I post this because many people dont know how to make signature in Photoshop,GIMP and etc, so here is a program that I use very very long ago when I'm still blind at Photoshop and etc. XD

Sorry but it is not working anymore and this thread is very old.

You can use this as an alternative -> <http://blueblots.com/design/online-signature-maker/>

would'nt load for me any ideas

Brandonn - December 3, 2008, 10:14 pm

Posted a million times before here.

CMD_What? - December 4, 2008, 1:08 am

im sorry but im a nub
how do i get it to save my sig?
like i created one and clicked save but it did nothing
i restarted it and still didnt work

Networkmancer - December 4, 2008, 12:22 pm

is It working now?

@Mirage

Sorry for that, I though it did not yet posted btw, it is still posted ones. It still have the difference, I have the quick download and the other will just lead you to the site. :D

Thanks for sharing, I'll check it out.

Networkmancer - December 7, 2008, 6:21 pm

Sure no problem,,

lilzhetka - December 7, 2008, 7:53 pm

i know who's the author of that program.. he owned also a Ragnarok Private Server! the ScytheRO

actually i exploits his server for about 3 months and he dont even notice it what a noob admin and he do WIPE OUT of all characters.. hehe

coolbobjoe - December 10, 2008, 5:53 pm

great easy app once u get it to work

narutogod - February 1, 2009, 6:55 am

SkullTraill - February 2, 2009, 4:01 am

I have that Program :D

Not complaining but its very simple..

very good for n00bs tho.....

PS is still beter :)

(im not complining at all)

Asselesion - February 2, 2009, 5:49 am

Great work dude.

Mackem Jitler - February 2, 2009, 8:27 am

Downloading now, thanks.

SILO - February 5, 2009, 11:25 am

nice program but i couldn't save it for some reason, but yeah nice progam

Fr0st_Byte - February 5, 2009, 11:28 am

Didnt start for me, and made my computer Much slower. I dont advice this, I advice GIMP or PhotoShop

Black Kat - February 5, 2009, 2:56 pm

Already used the program, positive rate for the fonts and backgrounds, cheers.

Why did you necro ?

chickenrules - February 23, 2010, 6:12 am
add a psd import support in it :)

BigG - February 27, 2010, 2:50 pm
Guys please try using photoshop. It's worth it.

Again, some idiot necroposted!

bluekiller13 - September 25, 2010, 5:37 pm
Any ideas why the fonts don't work...I did install the font pack to...

Bio-Blue - September 25, 2010, 9:58 pm
nice,but 1 problem I can't change the font...Why

punker6069 - December 10, 2010, 6:08 pm
seems to be a easy app once you get it to open...

janoycresnova23 - December 11, 2010, 2:51 am
How do I make one for my forum? I know it's a load of codes in PHP. I don't know.

Explo1t - December 11, 2010, 8:21 am
Fucking gravediggers. This is already oold and Networkmancer is no longer quite active so it's stupid to bring this up anymore.

Quincy - December 11, 2010, 11:59 am
Thanks for this!

Scavok - April 8, 2011, 3:11 pm
Looks nice i will try it out :)

DeMeR - April 8, 2011, 4:20 pm
I have another program that does this and more. Its kind of new but some day im sure it will be big. I think its called photoshop or something like that. Maybe google it and chek it out.

Mr.Billy - December 28, 2012, 5:18 am
Thanks for the sharing i check now i think it work

zRandom - February 9, 2013, 1:25 am
looks decent
checkin it out now
great
