Thread: [How to hide my keylogger behind a JPEG image and it still executes?](#)

RATorKeyLogg - October 22, 2013, 8:59 am

Do how do I do it? Yea I've used Celeste binder, yes it bind my keylogger behind the image, yes the victim will save it as JPEG file. BUT IT DORSN't execute.....so what is my problem here?

I also don't need a spoofed because it will be a simple JPEG file . So anyway that when the victim saves the image, how to make the keylogger execute and run automatically when He opens the picture?

Viagra - October 23, 2013, 10:06 am

Good one, I was also looking for this.

I think there must be a way to do it..

dBluRxD - October 23, 2013, 11:08 am

Not sure if theres a way but i want to know the same thing

!

Mr. 443 - October 23, 2013, 11:33 am

the only way iv heard of theis being done is by spoofing it. and there debate if it will even work anymore. i just bind my .exe's with the pictures, and when they click it they get a flood of pics that cover there screen (mostly man boobs) haha the irony!

RATorKeyLogg - October 23, 2013, 2:01 pm

Let's be realistic guys, spoofing changes it's extension, I already know that, When I bind my keylogger with an image. The victim opens the pic, but the keylogger doesn't work/execute.

Mr. 443 - October 23, 2013, 6:14 pm

probably because its no longer and exe its a pic that shows up then goes away...

The method doesn't work at all. If I bind it to pic, it'll save as jpg, therefore the keylogger in it won't run automatically. I'm sure there is a way for it, but it's kept private....wat yall think?

Mr. 443 - October 24, 2013, 7:50 pm

why did u quote me twice. the method is obviously secret or ud have an anwser by now. simole thing called an exploit and those are expensive

MirrorDude - October 24, 2013, 9:23 pm

No, you cant bind an image w/ an .exe AND have it successfully run.

However, you can prob spoof the extension and change the icon to make it look more legit

rahoool - October 25, 2013, 3:39 am

open the code of image and then paste ur keylogger code inside those images ...wen the image loads the exe code is also exucted...u even dnt need to spoof..and it will remain fud..just add junk code...hope u get ur answer now

RATorKeyLogg - October 26, 2013, 6:48 pm

could you please explain a bit more?

(Oct 26, 2013 06:48 PM)RATorKeyLogg Wrote: [\[CITE\]](#) could you please explain a bit more?
how exactly do I get access to the keylogger code or the image code???

I dont think it will work. if its working plz show the tut here so ppl get enlightened.

quentinz - November 1, 2013, 12:06 am

It will come out exe.jpg and most people are going to know it is a keylogger

CarlosAAA - November 1, 2013, 12:09 am

hey, can anyone help me set one up and let me know whats the best? I can give you some cash!

jmentor - November 3, 2013, 2:31 am

Hey,
I think what you need here is an extension Spoofer (Not sure about the name tho) search there's many tutorials in HF ^^
See ya =)

I saw a funny tip on these forums where a kid used Sexe.jpg to trick people into opening a log disguised as an image.

chakazullle - November 16, 2013, 4:21 am

i really need this to work,or an rat ti hide in a picture and the rat to have an option that it will instal when the windows start up (not to run ,to instal it will be awesome)

mackavelli - December 13, 2013, 9:58 am

i heard u can use a .doc exploit to do that but dont know of a .jpeg

Orions - *December 13, 2013, 10:10 am*

Very good thanks for sharing, I will follow your post ..
