Just a question here, how do you guys get female slaves on Dark Comet?

I can't tell if you were talking about syphilis or rats. OT try torrenting a song popular to girls or
something like that.

Like a Katy Perry song lyric video, then provide a download for the .mp3 and have it spoofed so they get infected?

Genius!

MrDivinity - October 22, 2013, 2:38 pm

The obvious, Justin Bieber songs, 1D and we all know girls love their photo editing.

This would mainly attract underage girls, which would result in the OP getting underages slaves, which means he would have access to CP if he turns on their webcam and see them get changed. He can pay a really big fine and do prison for this. So your idea is probably the baddest here.

PoisonKnife - October 22, 2013, 4:11 pm

Upload torrent with music albums (some kind of music girls like) and you'll get some girls :)

That's what I do and I now I watch them while they are sleeping, I talk to them (but they can't hear me) and I drool ?

Brilstern - October 23, 2013, 10:25 am

Th3PonyWizard - October 23, 2013, 10:36 am

Is this RAT section? I don't think so.

?pth?n - October 23, 2013, 10:43 am

Just think of what a girl would download.

They wouldn't download a crack for Resident Evil, but there are some good things you can try. Think of your own stuff, this keeps your method unsaturated.

Reptilian - October 23, 2013, 11:34 am

Try something with Justin Bieber. Or something only girls look up, like Makeup.

Sophistication - October 23, 2013, 12:46 pm

Make some sort of fake social media thing that has to do with like instagram filters or getting more followers

In the process of making this right now! Thanks!

PatSec - October 23, 2013, 4:22 pm

Backdoor or bind to the Sims 3 crack. :)

Cheers ?

Supreme??????? - October 23, 2013, 4:25 pm

You can do something about Instagram, such as a fake program that will get them more followers. You know Instagram these days: gotta get more followers xD. But yeah, I've made a server called "Instagram Instafollow". Still gotta crypt it though.

Best of Lucks hunting!

jarhizzle2013 - October 23, 2013, 5:03 pm

From what I know I have seen many females play Sims. So I would stick to like a No-Cd .exe file for them to install and show a vid where to place the file. On another note, I like the Drive by ideas. With my experience, get a popular facebook account and go from there. I would shoot for a guy with a lot of friends, probably around 18-21 of age and browse through the friends list. Trying to only go for girls, you will be stuck doing a lot of manual spamming and conversations.

Or instead of spoofing the extension just bind the mp3 with your .exe?

Lolerbeans12 - October 24, 2013, 1:27 am

Can't do anything related to One Direction. I made a .rar filled with rat servers, spoofed with .jpg, and numbered them sequentially. Called the .rar "One direction sexy pics"

Uploaded it to Kickass Torrents, and got nothing but gay dudes. Not only that but I keep getting banned from KickAss Torrents(KAT) anyone know of a good torrent site that won't ban for malware?

I did however, go to Wikihow.com and managed to change the download link for a program called Instagrille. (Yes the download link I provided was Instagrille with my server binded) If you could figure out how to change a link without any admins knowing, it's fucking gold for traffic.

I never get banned from KAT.

Make sure your server is FUD (not UD) and make sure you bind the server to pictures, a program etc..

Oh and when your server is detected, delete the torrent.

Nico626 - October 25, 2013, 1:54 am

how would you bind the server to a programe?

Bind your server to a "girly" game, ect Sims .Or bind it to a girl song....justin Beaver,Taylor swift,katty perry..

Rahul_Rulz - October 25, 2013, 7:54 am

Justin Bieber is a great Niche to Spread your RAT.

thePolarBear - October 25, 2013, 1:00 pm

Find a popular chick game(Sims) and bind it to your server...Also infect a mp3 song that is popular for girls (Justin beaver is a good one) and upload it

Jack Daniels™ - October 25, 2013, 1:17 pm

You could target them specifically, ie girls you know IRL, by using my ebook ;)

But in general, most of the methods have been covered, just do what you would normally do, but with something girls are interested in.. One variation would be something that they could bitch or gossip about such as someones naked picture that they know, or something that they would be keen to open.

I already get nudes, and I cant RAT girls I know. Thats way to far for me.

thePolarBear - October 25, 2013, 2:48 pm

Try binding your server with a girly song (JUSIN BEAVER) and upload it to a file sharing website. Also you can bind your server with a popular girly song and make a YouTube video of that song, With pics so it looks legit. And then in the description paste your server link that leads to your infected link....Or bind it to Sims (I heard a lot of girls play it) and upload it to a popular file sharing website....

Infect a family household then try and spread your RAT across their network, there's bound to be a few sisters with CoD addicted brothers. Hell, I got a few girls targeting people with a CoD hack alone - no doubt they ran it on their sisters PC.

This is also why you don't let anyone use your computer.

Just take note my video somehow appears on page one result one with some very popular key terms..
