Now this is a sexy app. Huge vouch for my frnd here xD

TheMedigator - October 26, 2013, 11:25 am

This looks amazing imo, for the sake of \$20.. You can use it for spying on people or just general trolling.

If i had a bank account or a way to buy it i would in a heartbeat.

Guys, do not hesitate to buy this! This is one of the best things I have seen for \$20. I used it and right away I was able to see the person's messages, just as advertised! I was able to get one person in about ~10 minutes.

This is extremely easy to setup (takes a few minutes). Anyone can do it, doesn't require any coding or anything like that.

This is an amazing product and GLWS!

No it won't.

All facebook apps use OAuth Access Tokens from their users to function. All the user's access tokens gets resetted when they change their password.

Just wanted to add that OP doesn't know what he is talking about. He feasted on this method that was given out in the free giveaways section and simply added a webpanel and charge people 20\$ a month to get the same thing but simpler and from quoted post it is evident that he does not understand how facebook apps / access tokens function.

No, we accept only PayPal and BTC.

Unlimited number of victims.

Your URL to spread would be of this format :

Code <https://apps.facebook.com/<Your app name>>

The victim just has to click it and approve and you are ready to go?.

Just a question about getting users: I provide the link to the user and she/he clicks the link and approve the app?

But what does the user get from this app?

If I get a new app on fb and it doesn't do anything I remove it. Would not this break the connection between the user and the facebook manager?

Most of the users just don't care if the app doesn't work . No one goes into facebook settings to remove it.

It is in the lounge because I paid Omni 50\$ to sticky it here.

(Nov 17, 2013 12:04 AM)Ashamor Wrote: [\[CITE\]](#) I just want to look at my husband's messages. Will this work for that? And how does it work?

Yes,It will work. You need to add this app to his facebook account and then you can see his inbox in your panel.

(Nov 17, 2013 03:44 AM)tig3ro Wrote: [\[CITE\]](#) It will work if account have second authentication by sms?

I haven't tested it but it should work because this does not login to the facebook account. It uses access tokens.

If he uses your computer all you have to do is infect your own computer with a keylogger , delete the saved passwords on the computer and make him login, everything typed will be sent to your email and then you can login to his facebook. ?

Kayef - November 17, 2013, 7:54 am

I don't get it.. do you need them to logon on the source first before it works?

We use our own computers so I can't go that route.

(Nov 17, 2013 09:18 AM)Ashamor Wrote: [\[CITE\]](#) We use our own computers so I can't go that route. You could make a fake facebook of a hot girl in the area spam a friend request to every person you

can and try to make it look legit, set it up against him as bait.

Maybe even a 1 more fake one to fake post on your fake one s it's not 50 people going "who are you", set up settings right etc..

If you want his FB you have to be doing some infecting of some kind or have access to his computer one way or another.

You might be able to get a decent hacker who can do this for you but you will have to pay him decently and he might not give you what you want, so do so at your own risk, either way with this program you have to get him to use it.

Goodluck`~

yeah I would of recommended that but you need a FUD one and to get him to open it, that being said you don't seem like you know too much about this and scammers prey on new members like that so make sure you get a legit one if you do that.

Also a paid crypter and keylogger would work aswell.

This is awesome lol. Id like to have this but im broke x) anyway, this is cool because this can also revolutionize ratting. instead of having a rat software you can just go to a website. almost like a ftp password manager but this is way better since it has way more features. im smoking weed right now but dude... this would be a million times better if it had all the DC, blackshades, etc rat features all on a web browser. (stream slaves desktop, mouse control, keylogg, fb msgs)... idk its an idea haha idea probably was already thought of though lol.

I have a vouch copy if anyone is willing to test this for me and write a good review.

Are you able to provide a couple day trial for vouch ?

I am very interested in purchasing this but a bit low on cash at the moment, also I would like to spy on my girlfriend for personal reasons..

So just a question.

So i just create an app on FB, and then share the link, and when people like the page/hit accept to get their FB info, you get access to there photos and messages?

Create App On Facebook

When user accepts the app

You have access to

Read Inbox

Update Status

Update Status of Page's owned by the user

Like Photos,Status made by Pages

Like Cover Photos of users

What if the person deletes the app? We lose control over the victim, or can we change the appid with a new FB PVA acc and 'recycle' the user?

The user will have to authorize the app. He can only remove it off his facebook account not facebook itself . You can have unlimited victims. You don't need to create a new PVA Account . You do have the option of changing the app id though.

(Dec 2, 2013 12:21 PM)Kayness Wrote: [\[CITE\]](#) This is a great tool, but I think the prices are a little high. -that's just me though.

What I meant was if the user deletes the app, we can't post from the user acc anymore right? I'm asking as there were apps before that you could change the appid and you wouldn't lose the user from the db.

Yes, If the user deletes the app you can't post from the user id. I have not seen any app that can do this can you PM me if you find any links?

50GTB - December 2, 2013, 11:42 am

It's a simple concept, basically you would need let's say 5 different apps and rotate the posting between those apps, if 1 app went down you could use a different one and you wouldn't lose the user.

Setting this up takes 5 minutes max. Spreading it is upto you, If you already have huge facebook pages you can post your app url or you can ask people who do this service for money. A few pages should get you instant victims. Some of my customers have spread upto 1k people in 4-5 hours with a few facebook friends. The more victims you get the more viral and faster you can spread cause you can use the inbuilt status update tool and page status update tool to update tge statuses and pages owned by the victims .

It looks nice mate, but uhm... it looks like you're just making an app that requests permissions for what-ever you want access to (ex: inbox, photos, etc), then on your panel you're just calling the facebook graph api from the token you grabbed when they authorized the app...

Could you elaborate and tell me if I'm wrong or not?

After testing this out, it was working fine however one issue.

It appears as though I'm not the only one posting using these accounts as I used it on one of my own as a dummy test and I can see that it's liked a photo and made a status which I didn't make.

So, I'd just be wise of that if you plan on purchasing, not a huge deal but I think if I'm paying for it I should be the one to use it not an admin that has access to it.

We do have access to all the accounts . I was doing a regular checkup to see if all features were working. Accidentally ran all on all victims. It was not on purpose. I strongly apologise for the mistake. This is the first time it has happened and the last.

Many people accept apps from most anyone just to get rid of the Facebook alert. Just send it to everyone on your friends list.

You can also create a fake account or use your real account to add a ton of random people and send it to all of them.

Correct me If I'm wrong . Not wanna trash sales , but Can't I just create the app via developers.facebook.com and set permissions to ask from users -> such as user_likes , user_Status,read_mailbox ,share_item,status_update and so on ..

Yes you could do that. Just create an App on facebook and get permissions. But how will you actually use your victim's profile without an Interface to manage them?

Our product's features

1. UI to manage all your app users.
2. Automatic removal all users who deauthorized your app.
3. https enabled site. So your infection will be on apps.facebook.com and not any 3rd party domains.
4. Manipulating user's inbox to display them in a neat manner is tough. We do that for you.
5. Landing pages for app.

Because as far as I know, Facebook is cracking down on applications such as these. Even warning the users not to click on the application as it allows the app to have full control over the victims Facebook and such.

Yes, It is completely working. Facebook has not done this for our users. Each user has their own Facebook app.

Can you pm me some solid proof of it happening ? I would like to take a look at take measures to prevent it from happening it to my users.

Yes, they will be able to see before accepting the app but most people just don't read it and accept it anyway.

I have not really used the app myself personally for spreading. Some of my users use Social Wrench. It gives out great results.

Yes, You just need to create it from your Facebook account. No messing around with the code.

Yes, You need to send the app link to your friend. Once they accept the app. You have full access.

Create a New App and enter the new app id and secret in the panel.

Allergy - January 9, 2014, 11:14 pm

I'm interested but my main concern is exactly what do I do? I create a app and just send it to people and tell them to check it out they accept it and boom I have access to certain things on or in their profile? I'm sorry but I would like to know what I'm getting into before buying. Thank you!

Also when reading through their inbox if they get a message that was just sent to them and you see it first if I click on it will it show up as a read message or will the seen at "time" message appear at the bottom.

Incorrect. If the victims re-authenticate/open the app, the token will refresh automatically. Still wondering what this does beyond being a wrapper for the Graph API.

No it does not do it silently . The user has to validate the app in order for the app to function.

You are supposed to send <https://apps.facebook.com/yourappname> to your friends. I wouldn't have made this product if it was going to be spread that way.

Yup but once the app asks for permissions and the user denies it, the user is redirected to the btcmine url which says 404.

At the end of this, my Facebook got deleted by Facebook and I had to go through a bunch of security stuff to get it back. Also I'm no longer allowed to make any apps from my Facebook account. So I suggest doing this not on your main account.

I'll add that note to my future customers, sorry you had to go through this. We are also increasing the price so that not anyone can purchase and saturate it.

I am unhappy with your service to lifetime customers. AWHILE back now I bought a subscription, when I think it had another name like fbrat, but I'm not on my pc to check atm. I bought life time and when I went to use it a while back It was expired.

Also had 2 bad experiences one where they accidentally posted to the walls of the people I had infected and one where all my infected magically vanished after an update.

This was a while back so I doubt you guys will even bother to look into it, but it would be great if you could set me up with an acc again. I have the records of buying. At that early time I was told it said a limited amount of days till expiration (on the panel) because all I had to do was tell you guys to reactivate it to continue using it. I have a Skype chat log of this if you want to see it. But if I can be reset up with everything that would be great.

Please respond to this.

(Jul 7, 2014 07:42 AM)Tony Stark Wrote: [\[CITE\]](#) I am unhappy with your service to lifetime customers. AWHILE back now I bought a subscription, when I think it had another name like fbrat, but I'm not on my pc to check atm. I bought life time and when I went to use it a while back It was expired.

Also had 2 bad experiences one where they accidentally posted to the walls of the people I had infected and one where all my infected magically vanished after an update.

This was a while back so I doubt you guys will even bother to look into it, but it would be great if you could set me up with an acc again. I have the records of buying. At that early time I was told it said a limited amount of days till expiration (on the panel) because all I had to do was tell you guys to reactivate it to continue using it. I have a Skype chat log of this if you want to see it. But if I can be reset up with everything that would be great.

Please respond to this.

Tony Stark

Uh. All you had to do was send me a PM with your username to activate your account back like I said on Skype. You are unhappy with my services yet you want the account back? I'm not saying I'm not going to activate your account but it would be great if you could say the tool got the job done for you.

I'm online on Skype now for sales and support.

bought this weeks ago, pm'd mandark multiple times.. gonna try again

jgkilian777 - July 14, 2014, 3:39 pm

Are you still selling and does this still work?

Tony Stark - July 16, 2014, 5:09 am

Did you guys change your skypes? o.O Still waiting to get my renewed account.

N1GG3RS - July 16, 2014, 10:42 am

I want to buy this but it seems like no one is getting a response, so idk :\

m4dh4ck3r - July 17, 2014, 5:41 am

Was on Vacation I've responded to all PM's and Skype messages so far. Don't PM Mandark anymore.

You were talking to me and went offline. Then you posted on the thread that you replied to everyone, when clearly you haven't resolved the issue.

Please provide me assistance.

I got my Lifetime Package!

It is not a scam.

It's an awesome Application. I have 7 Ideas how i can spread my Virus Files with this. It's awesome!!!

Really, big vouch for m4dh4ck3r! It's not a scam like some unhappy People try to say. Don't believe them.

Sadly I don't have a cheating girlfriend so I did not actually purchase this product.

If you don't believe it's a scam then look over the thread, So many people not receiving support for what they paid for.

tut tut.

I've sent a pm and tried adding him on skype with literally no response on either although OP's been posting around HF...

Even though the support incredibly needs sorting out, even if someone else sorted it all out -- hope this bloody thing works IF I ever get a reply from the seller

My goal here isn't to stop you getting sales.

Just give support like you said you would.
