Thread: [Office Exploit Question - Bin or Builder?](#)

zetustiger - October 26, 2013, 1:46 pm

<https://hackforums.net/showthread.php?tid=3816451>

Im planning to buy this office exploit and there are two packages, bin and builder? what is the difference between the two and will I be able to make a .doc exploit using only the bin?

tux1 - October 26, 2013, 5:23 pm

Bin is short for binary, in means that it's the compiled file. So you are paying for the seller to make you one infected file.

The builder is the tool that makes you compile your own files.

Use extreme caution when dealing on hackforums because most members are just kids that don't know what the hell they are doing.

hey!

can you give me genuine contact to Office Exploit shop. I need the builder.

Thank you.

did you end up finding an answer?

Vyrrezz - July 14, 2021, 2:52 pm

I'm not recommending office exploits.
