Thread: [Modern theme.](#)

Michelangel? - October 26, 2013, 4:37 pm

I would like to say the green when hovering over a link and tabs looks alot better. The purple is just a little much and makes it harder to see because everything else around it is purple. If You(Omni) can open a poll or something that would be nice.

P.S. I know these threads are annoying but, that is my only problem with the "Modern" theme.

Volim te - October 26, 2013, 4:39 pm

No. The HREF hover colour (purple) is indeed sexy, Much better than the green colour!

It's just a small detail. We can't have a poll vote for every single site change. That'd be madness.

This is true i don't mind it not changing but, i would prefer it too. If anything I'll just use old school theme.
