Thread: [\[Latest Trick\] Working Facebook Page Merging Trick!!](#)

Bollywood - October 26, 2013, 11:28 pm

Hey Friends Last week I came to know that some Facebook Spammers found a way to merge Facebook Pages! ? (Note: Facebook has removed the function of merge ?) These spammers are asking people to give them dead pages with 4k, 5k and merging them and making pages of 50k, 60k with in 1 - 2 days and selling them! ? They are selling this trick for money! Once a member of that group insulted me ? So I decided to reveal their trick for my hacking forum brothers for free! ? So I asked my friend (He is in that group) to tell me this trick! I haven't tried this! Use it before it stops working!! ?

Lets merge two pages Page Of Any Name:

1. Imagine I have two pages! Page 1 = Hacking (Its has 500 likes) and Page 2 = Crap (It has 5 likes)
2. Open both pages in different tabs!
3. Go to edit page and change page category to "Local Business" (Both Pages)
4. You will see add address option in page setting! Put a valid address there (Note: Address should be valid and same in both pages)
Bro Tip: 1020 86th street, Brooklyn, New York, Postal code-35062
5. Add a valid phone no. and website in both pages (Note: Both should be same and valid)
6. Save It.
7. Ask You 8 friends (or use fake ids) to go to page 1 (Hacking)!
7. You will see a "suggest an edit" button there! click it!
8. A new pop up window will open! Below You will see a "Duplicate"! Put You second page link (Crap) there! and click suggest!
9. After 8 suggestions of Your friends or members of page or Your fake Ids, go to setting! You will see a page merge request there!
10. Done! Your page 2 = Crap will be delete and You will see 5 more like in your Page 1 = Hacking (Now 505 likes)

Merge all your dead pages! Hope You will like this Trick! Sorry for my bad english! Comment If You liked it and want me to post more hidden trick! Thank You ?

I tried but not working anymore...facebook fixed this...I want to merge pages give me another trick

PoLoW - October 27, 2013, 1:37 am

Dude this happen to my be accident and i fucking ruined my Original page with the Shitty page .

i was using my Phone and suddently two pages became one page , i will try your trick right now .

kaspor12qw - October 27, 2013, 9:18 am

are this trick is working ? i try it by not working

You said :

8. A new pop up window will open! Below You will see a "Duplicate"! Put You second page link (Crap) there! and click suggest!

But when i click "Suggest an edit" all i get is two options :

Category :

Official Page :

Where is the "Duplicate" Link ?

Facebook did some changes! You can put your 2nd page link in official page! :)

Please explain this more clearly, what do you mean by suggesting to friends?

You have to ask you member or friends to go to your page and click on "edit a suggest" and

suggest your 2nd page there :)[img]http://s9.postimg.org/tlsnwwmwv/image.jpg[/img]

Didn't facebook remove the duplicate button from 'edit a suggest' ?

Yeah! I came to know that... there is "official page" option now... You can try that.. put your link there ... it should work.. :)

DATAHOARDER - *November 21, 2013, 2:28 am*

Thanks for sharing this trick :)

You now need to put the category as books & magazines, then the secondary category should be "Books"
