!trace <IP> - show IP lookup

!ddos <IP> <time> - for premium only!

!shrink <link> - shorten a link with our adf.ly

!check - check our service status

!help - shows this help text

!about - Shows the about text

It does this for alot of my Skype resolvers, or sometimes something just comes up that looks like this.

dawid17 - April 11, 2014, 3:55 am

Anyway to make the bot work? it doesn't respond from 2 days, and always had 100% resolves.

kiteyo - July 11, 2014, 5:52 am

is the service dead? or is it coming up again

RainSpider3000 - July 11, 2014, 11:33 am

The Skype bot project has been discontinued. I don't know if it will be re-continued in the future or not.

MrKoniieTroll - July 11, 2014, 11:50 am

Skype has suspended them. So they stopped carrying it on.

RainSpider3000 - July 12, 2014, 10:51 am

I have started a bot, continuing their legacy! Add "abrasivebot" to Skype.

adelfino69 - July 12, 2014, 10:57 am

still working for you guys?
thanks

thanks

anarchyskypebot was discontinued by badkiller. It will no longer work. If you want a working one, add "abrasivebot" to your contact list. It is my working version of his.
