Step 4, Finishing Up

1. If your using Notepad/Wordpad, after you have finished your code make sure there is a space (Press Enter) between each sepperate code. Then save it as a bat, if you do not know how then look at the following... Spoiler ([Click to View](#))

[img]http://img94.imageshack.us/img94/8417/savingex.png[/img]

2. On Batch Virus Creators, just find the button that says "Save as Bat"

Step 5, Binding The File

1. Now obviously we all know that you can not bind a bat, RIGHT? So we will need the "Batch To Exe" Converter. Download: [Click Here For "Batch To Exe Converter"](#)

2. Open that program, no installations.

3. Do not touch settings Spoiler ([Click to View](#))

[img]http://img18.imageshack.us/img18/2944/btecex.png[/img]

4. Click compile!

Step 6, Your Set

1. Open up whatever binder you have or use and bind the 2 files!
2. Comment on this thread to keep it up so that everybody gets to see this.
3. Go spreading and remember the name PiLoT
4. Let me know if you didnt understand something or if i missed something!

Arenh - April 24, 2010, 12:01 am

very nice! i will try this out, good idea.

Intern0 - April 24, 2010, 9:55 am

sweet thank you! So we just bind the batch,(batch=usb spreader), with out virus?? and spread the result of the binded files and one someone runs it, will infect every usb plugged into the computer, and infect the computer with the virus?

Lin - April 24, 2010, 9:56 am

Correct, its adding a usb spread mode, as well as killing a AV and disabling taskmanager, some bots alrdy support usb spread, but none kills AV n taskmanager on contact. Yo yes what you said above is correct NinjaAlex

MysticMugg - April 24, 2010, 11:12 am

sweet thanks for the share

iSmile - April 24, 2010, 11:13 am

Good tut (H)

thanks for this one!

KoRn0ntheKob - April 24, 2010, 12:33 pm

hey i binded the files and stuff but... now what? i honestly dont know what to do :P

The Pilot - April 24, 2010, 1:09 pm

Now you begin spreading your binded file, its an improved way of spreading, rather than just spreading the bot itself.

The Pilot - April 28, 2010, 9:19 pm

shlomidadon - October 15, 2010, 4:17 pm

Is it working on vista and windows 7 also ?

The Pilot - October 15, 2010, 4:52 pm

yeh theres no reason why it shouldnt..

shlomidadon - October 16, 2010, 5:05 am

There is reason, because I heard windows 7 disabled autorun:

<https://hackforums.net/showthread.php?tid=700120&pid=7049593#pid7049593>

Can you deny/confirm that?

The Pilot - October 16, 2010, 11:33 am

What do you mean auto run?

The Pilot - November 12, 2010, 7:38 pm
