Thread: [Help -Need one ioncube file perfectly decoded -managed to decode it but its messed up](#)

an0nwigl3 - October 28, 2013, 3:59 pm

Hello guys,

I needed to decode one single ioncube encoded file. It has around 650 lines. I managed to decode it using a decoder called DeZender with Osiris Engine but most functions and variable names are messed up.

Could anyone help me out or recommend someone that would perfectly do it?

The file is pasted here: <http://pastebin.com/F9mBKBX5>

I know that iDezender has a 99% success rate, but it doesn't make sense to buy that product to decrypt only one file. Maybe someone with access to a good decrypter can do it.

Thanks ?
