1) Download LogonStudios here:

<http://www.stardock.com/products/logonstudio/downloads.asp>

2) Install LogonStudios.

3) You can get a few FBI logon screens from here:

<http://www.wincustomize.com/explore/logonstudio/search/fbi>

That's pretty much it, enjoy !

Malaco - October 29, 2013, 1:29 am

First link doesn't work anymore. Got any alternatives?

Searched LogonStudio on the website. I believe this is the correct link:

<http://www.stardock.com/products/logonstudio/downloads.asp>

Edit: Here's the second link too http://www.wincustomize.com/explore/logonstudio_xp/9606/

Reuploaded the files on FileSment just incase the first links don't work.

LogonStudio: http://filesmelt.com/dl/LogonStudio_public.exe

FBI logon file: <http://filesmelt.com/dl/FBILogin.logonxp>
