Thread: [i want to blow someone's pc](#)

sufarman1 - April 24, 2010, 3:57 am

i was playing Rumble Fighter and an user has created a room with the name "i have Carat(Money)hack,who want this hack add my yahoo"and when i add him he gave me a program that tells me to put my username and password and when i put my account details the message with account details was send to all my contacts from yahoo messenger and he says "XD ur so noob f*** you a**hole and thanks for ur account"

and my account was lv 39 and he trick me and he swear me and he makes me look bad to all the people from my contact list ?.

I WANT SOMEONE TO HELP ME TO MAKE SOMETHING BAD TO HIS COMPUTER ?,and if is possible i want to take his computer remotely and throw it in his head. Pls teach me something,anything i want to destroy his computer.

Lotos - April 24, 2010, 4:02 am

Read tutorials about rats. Also remember next time to not run any programs from people that You don't know.

Weregaurumon - April 24, 2010, 4:56 am

Ehh, wrong section. You can search this forum for some RATs that will allow you to steal passwords and control his computer, but if you only want to "kill" his computer that simply use some batch virus and that's it... ?

sufarman1 - April 24, 2010, 9:04 am

well i want to make him suffer two,i want to send a RAT to him to control his pc and download porn movies with gay's and animal's and put them to his desktop to make him look bad.But is there a way to send a virus to him without his permission? because if i talk with him i just swear him i can't send something to him because he knows that i'am a noob because he trick me.

Larzsify - April 24, 2010, 1:05 pm

do a search on youtube: how to make batch virus

sufarman1 - April 24, 2010, 1:26 pm

but i think after a batch virus he can play on his pc after he reinstall his windows.

sorry for editing,now i know what batch means i was using this to make fake viruses and shutdown a pc but i think it will be better if i send a rat but i don't know how to send to him without talking with him because he will not reply or he will make fun of me

Anonamoose - April 24, 2010, 3:07 pm

I think i know what your looking for, go into My Computer and find System32, delete it then you'll have access to the tools you will need to defeat him and throw him into his computer.

Lmfao, if you are retarded enough to fall for that I don't think anyone will even try to help you.

SmokeWeedEatYogurt - April 24, 2010, 6:09 pm

That dudes such a boss. Making it send it to all your contacts, LOL!

Mario - April 24, 2010, 9:05 pm

You sounds like a real jerk :) never the less. just send him a batch fucker or get him on your RAT

exnyon - April 24, 2010, 11:32 pm

Well, first, learn to speak English.

After that, you should learn to social engineer a bit.

Then, send him a destructive virus :)

Simple as that.

ULH4L - April 24, 2010, 11:48 pm

Why would you want to blow someones pc?.. >.>

sufarman1 - April 25, 2010, 12:45 am

You guys don't know how do i feel, if ur not helping me why u post messages like those,how this forum can help?you guys just want to make me feel like an idiot,this is hack forum right?

and i know my english is bad but not so bad that you can't understand,and that guy trick me because i saw many users that came in that room and saying"wooooow thankyou very much"and others saying "dude.....don't help others with this hack".And ive never saw a virus like that one,and i will never use other program's from other retarded user's.

and i just want to send a rat to him to control his pc but i don't know how to send without talking with him and if its posible to do that.

You guys helping me? or not.

Xenochrist - April 25, 2010, 3:53 am

Turn off the computer kiddo

strain67 - April 25, 2010, 7:24 pm

I guess if someone actually wanted to help this kid they could just crypt a rat into the "money" program and just say send it back to him saying it doesn't work. Might work?

Not gonna lie, I feel bad for the kid.

ch4d - April 25, 2010, 7:52 pm

were not your personal army and why did u fall for this?

sufarman1 - April 26, 2010, 12:08 am

if nobody can help me its ok,i was thinking this forum can help me to give to that bastard what he deserve,he make me look bad to my messenger list,he stole my 39 lv account,he swear me,and he terminate my pc with tousands of viruses.

mmm now what i must do...oh i know, i must be a fool and let him to make fun of me.

i have ProRat_v1.9 to hack him but i just don't know how to send a prorat server to him much easier or to be undetected by antivirus.

Surj - April 26, 2010, 5:17 am

Listen mate you need to trick him by using a differnt ID/username, become friends with him and do the same or worse to him its not that hard. Manipulate the fuker and your done.

Also change the way you type your english or he will be onto you. Follow the tuts on this forum and your good to go. Just takes abit of time and patience, Im new to all this myself and this forum is very helpfull.

Hope that helps

sufarman1 - April 26, 2010, 7:09 am

thanks i will try this
