Thread: [Find and Replace in html](#)

illLusion - October 29, 2013, 2:21 pm

Hey guys, so I have an html document I would like to parse through for multiple strings, ie...

If HELP1 is found replace with
This is the help sentence.

If HELP2 is found in the html document replace with
This is the second help sentence.

Could someone help me do this?

tweety - October 29, 2013, 2:26 pm

[http://msdn.microsoft.com/en-us/library/fk49wtc1\(v=vs.110\).aspx](http://msdn.microsoft.com/en-us/library/fk49wtc1(v=vs.110).aspx)

PHP Code

```
<?php
string someHtmlDoc = <someHtmlDoc>;
someHtmlDoc = someHtmlDoc.Replace("HELP1", "This is the help sentence.");
```

PHP Code

```
<?php
string someHtmlDoc = <someHtmlDoc>;
someHtmlDoc = someHtmlDoc.Replace("HELP1", "This is the help sentence.");
```

That helped, now what about text in the html document?

tweety - October 29, 2013, 2:57 pm

I don't understand what your saying. Text? That replaces the text and that's all you asked for.

You're*

What about if they're multiple instances of the text in question? Or even if OP wants to replace text like, "is" or "or"? Very common combination of letters in many words. Try harder.

@OP, we need more information, this question is very broad with many pitfalls to look for.

learnerguy - October 30, 2013, 11:16 pm

```

'First we check a directory containing your html file
For Each file As String In Directory.GetFiles(yourlocationtograb)
'Then we check if the file in the directory is an html document
    If file.EndsWith(".html") 'If it does then we tell the program to open the file and replace the text
from your textboxes with the tags in your html file
    Then
        Dim R As String = IO.File.ReadAllText(file)
        Dim text As String = R.Replace("%yourtextinhtmltobereplaced%", v3t.Text)
        IO.File.WriteAllText(file, text)

    End If

Next
'in case there is more then one file
Happy coding

```

Did he ask you to say that or did, "Dick ride mode" enable itself? Everyone complains about this section for various reasons & I amongst others that have also drifted from this section believe second to moderation, or lack of it, Ubers being pedantic fucks to non-upgraded members yet more than willing to help an Ubers until the cows come home is a big problem too.

How are we supposed to teach people like this? How are we suppose to welcome any new members apart from close-minded morons who don't want to learn? And what have the mentioned come to be known? Skids. No-one likes skids. /Reason

Excuse me ? Your drift from this section couldn't be but enhancement to this section, at least we got rid of you and your asking for help threads, I couldn't find one thread of yours sharing any knowledge.

Ironic how you're talking about the hierarchy powers, when you're the first to abuse those powers. Your threads in this section are nothing but "help" threads or "opinion" threads. you're abusing your Ub3r rank to ask question hoping to be answered since you're Ub3r. Funny wasn't that your point ?

And plus, It's legit for Ub3r members to be answered more often. Since Ub3r members are HQ users manually picked by Omni himself, which makes their threads more HQ and understandable than others.

Lmfao. My main requests for help was with GDI & Mono.Cecil & I think you'll find, I was the first to post a Cecil thread with my findings & offered & did help people learning it too & included credits to those who helped me too.

So much lol.

Bullshit doesn't play well on the internet mate. Discussions are the collections of people(s) opinion(s). Is that not what Forums are? Void point. I never said I haven't asked for help, I'm quite proud to admit that HF users honed my VB skills. Void point. You may also find that when you think I was "abusing my power", I was either alpha or l33t (neither of witch I paid for, I was bought them for being HQ from 2 different users). Void point. And no, I didn't ask for help because I was Uber so I'd get an answer. Void point. Smh.

Ralf. Definitely deserved a ralf.

Look, I don't wanna hijack this thread anymore, it's deemed LQ.
