We tested a 512MB server together and absolutely no lag came from it.

Best hosting for the prices here!

DDoS Protection: We have 10Gbit/s DDoS protection available for \$13.50/month (added on to original server price).

nKRYPT - October 31, 2013, 1:11 am

Plenty of servers available! Take your chance to get our servers while they're hot!

Krew - October 31, 2013, 1:17 am

Are these 100mbit or 1Gbit, and does it have DDos protection?

They are 1Gb, and they do not come with DDoS protection. Although, I have thought of making it an add-on to get DDoS protection, but it probably won't be cheap.

How long will this service be around? I've seen you've had multiple services in the past and am not sure if I could trust this if it won't last long.

I am very cautious and am not sure if I should buy this or not.

Thanks

The reason BlackIceHosting didn't last, is because barely anyone bought anything, so I'd be losing a lot of money if I kept it up. I believe no one bought from BlackIceHosting, actually.

Alright. I was slightly confused because I checked your posted threads and you didn't have anything called SliceHost.

Stl, more than 75% of those services are not hosting related. You're just here to trash my sales, and you know that. It makes it almost a sure thing because when someone asks you what you think of me, all you know how to do, is call me a fag. And when you say something like that to people about me, it's quite clear you dislike me, and that would be a reason for you to attempt to trash my sales.

I'm here to give my personal opinion on you and your products. Nothing you make lasts, just letting people know that.

Well, as far as Amazo goes, I will completely prove you wrong on that. Mark my words. As far as the hosting, it's something I cannot guarantee due to the fact that a lack of customers, will cause any host to go down.

Hamware - November 6, 2013, 9:33 am

Quality products, comes from nKRYPT. Although, I do have to agree he doesn't keep things up for long. But I believe he has reasons for that, and I also believe that this hosting will be around for sometime. Anyway, good luck sales mate and might purchase from this hosting. After my other hosting runs out, also do you have EU servers?

We do not have servers located in Europe, but all of our servers have low latency. They're located in the United States, but some of our customers live in the UK & Australia, and they don't have lag issues. ?
