No problem.

LOL! ? You're gonna piss quite a few people off, I can see why you didn't have that in the OP.

Do you have a legitimate reason for wanting this site damaged? Or do you just have some kind of an ignorant predisposition that forces you to hate Muslims?

Keep in mind, arguing religious beliefs outside of the debates section is a bannable offence. (Then again, I'm pretty sure you're a gonner anyway) So I hope you have a legitimate reason.

Doesn't look like they'd even notice, their footer note is "Copyright © 2009" lmao. I analysed the headers and it looks like they're running apache. Their host is one.com according to whois, so Apache is probably up to date. There's a complete dox of the domain registrant available on whois thanks to UK TLD restrictions.

Sadly, I can't scan for any vulnerabilities as my Kali installation won't boot atm - and that site is crazy basic, there's not even a database linked to it. You're going to struggle to find anything; all they use is Varnish.

EDIT: If you really want it deleted, you can report it yourself. I don't think there are any HF users who purely hate Christmas; as long as this isn't a religious war I believe you're fine.
