Thread: [Security Analysis - You will need this .](#)

BeggFoMercy - October 31, 2013, 4:07 am

This is only for the educational purposes , I'm not responsible for what you do with this .

Note : This isn't any kind of advertising at all , No flame ups .

So I've made an Online website that contains a compilation of :
Tools

PHP Shells

Local root exploits

Hacking Challenges

This website is also attached to my own blog that contains all of my tutorials in the scene of hacking .

I'm willing to update This compilation so If you have made your own tools and you would like to add it to this compilation , Feel free to PM me .

Note : If your tool is some how backdoored or Infected , I won't be able to add it to the compilation .

Website's URL :

Code <http://htn.comule.com/secanalysis/index.php>
