Hi HackForums,

I'm back with 3 defaced websites I hope you like them:

<http://klganju.com/defaced.html>

<http://azawad.eu/>

<http://visiongroup.cl/rn.html>

Funny how you can look at the code of the deface, and see this. <http://k0en.nl/>

Funny how "your" deface template@ <http://k0en.nl/> looks a lot like the one from this website found within /your source code.

<http://dicksonfong.com>

So what are you going to tell us next? ..That that's your website and "You're a designer at Google."? lol@Here take this shovel you're gonna need it.

It's just an index page it isn't a deface as it's my own website. I'm not a designer at google? I never said anything like that and i'm never going to do so.

I know your butthurt because I said that "your" shell is just some one elses but come on... don't act so childisch.

And the people who like my deface page don't 'like the homepage of my website but my deface pages.

For example:

<http://klganju.com/defaced.html>

<http://azawad.eu/>

<http://visiongroup.cl/rn.html>

Yes, you are definitely a leet guy. <sarcasm

It's like hacking Google with a image hosted on my personal website..

These people are so jealous :P These are pretty nice and the first one was funny as hell

Icmp Traffic - November 1, 2013, 7:06 am

I like the song but one question thogh mate why dface when you could use this as a putty booter i guess it is what i would do.

lol this is funny i can see the admins raging lol.

If you get so mad about people stealing your defaces, why not actually encrypt the HTML?

HOLY SHIT really?!? I've been waiting so many sleepless nights to see them.

Anyway, the 3rd one is the only good one imo.

The third one wont load for me. ? ?

Edit: o wait that was the 2nd.

Icmp Traffic - November 1, 2013, 4:19 pm

LOl someone replaced one of your defaces lol.

K0eN, you have some wonderful defaces.

SpheX™ - November 3, 2013, 7:24 pm

You hacked in with:

<http://klganju.com/subcat.php?id=67>

The typical exploit lol
