Thread: [Charny NotePad 1.0 \[Advanced\]](#)

Charny - April 24, 2010, 2:56 pm

Charny NotePad is an advanced and powerful text editor. It's fast and easy to use.

You must have the .Net framework to run this program.

Features :

- Tab system
- Line numbering
- Find/Replace function with regex support
- Format functions (Alignment, bulleting, change font, etc)
- Edit functions (Undo, redo, cut, copy, paste, etc.)
- Insert Date/Time
- Insert special characters
- Printing
- Full screen mode
- Zoom in, zoom out
- And much more!

Pictures :

Main window :

If you downloaded the program, please post a comment/suggestion.

Thanks, Charny.

?Cooldude? - April 24, 2010, 2:59 pm

Brilliant, I would test but I am on my iPod touch at the moment. Looks great though.

Charny - April 24, 2010, 3:01 pm

Thanks :D.

Bitwin - April 24, 2010, 3:02 pm

Finally, can't wait to test ?*downloads*

Edit: WOAW, the gui is even sexier when it's not a screenshot ?

Charny - April 24, 2010, 3:04 pm

I hope you will like it. Please post some feedback after. :P.

Bitwin - April 24, 2010, 3:07 pm

This is totally one of the better text editors I've used. Where did you get those icons from ?

Charny - April 24, 2010, 3:12 pm

(Apr 24, 2010 03:07 PM)C00k13 Wrote: [\[CITE\]](#) This is totally one of the better text editors I've used.

They're from a pack that I downloaded some months ago.

DeltaNox - April 24, 2010, 3:17 pm

Awesome notepad! Very well done. :)

nanoChicken - April 24, 2010, 3:18 pm

this hawt man!! very good job!

maybe u can add syntax highligtning features also?

Charny - April 24, 2010, 3:21 pm

Thanks ??

Charny - April 25, 2010, 5:44 pm

I finally added syntax highlighting :D! It will be in the next version.

Also, I could add C#/Vb.net compiling. Do you think it's a good idea ?

wesnr - April 25, 2010, 5:49 pm

(Apr 25, 2010 05:44 PM)charny Wrote: [\[CITE\]](#) I finally added syntax highlighting :D! It will be in the next version.

I second that, Posing as a girl to earn respect....

Not cool bro...??

OP: Nice download, i'm sure to use this!

CONSOL3 - April 25, 2010, 8:36 pm

looks amazing, professional project if you ask me.

Charny - April 25, 2010, 8:48 pm

Thanks for the comments!

Krisserboy - April 26, 2010, 11:58 am

Nice done man! :)

Your gonna make more versions :D? I would love to use them XD

And like Nano wrote yer syntax highlightning would be great :P

SCiLSiTR - April 26, 2010, 12:28 pm

This is FREAKING AMAZING! Good job! I wish I knew how to do the tabs that well. :P

BaBa Nigger Sheep - April 26, 2010, 12:54 pm

Nice to see you got the line number working, well done. Have you managed to to syntax highlighting yet?

This is practically competing with some of the big notepads out today, all it needs is some good recognition.

Modesty - April 26, 2010, 1:01 pm

Syntax highlighting is very hard to impleent charny, especially when youve got A LOT of text. My java IDE lags like shit...Lol

BaBa Nigger Sheep - April 26, 2010, 1:03 pm

P Y R O - How come you left me on tv and msn?!

Also, yeah it would fucking own with syntax highlighting.

Charny - April 26, 2010, 1:39 pm

Thanks for all the comment.

I won't add syntax highlighting in the next version, I will do a new notepad with the ICSharpCode.TextEditor component. It will be a 'Programmer NotePad'. You won't be able to change the fonts, text aligning, etc. But it will have syntax highlighting support for a lot of language and a lot of others features!

HughGRection - April 26, 2010, 3:03 pm

All I Have to say is, Beautiful.

Thaaaank you :D.

[Chocobro] Nilef - April 27, 2010, 11:44 am

This.

Win.

Usually it's nice just to see a decent program here that isn't a binder, crypter, stealer or spammer, but this goes further. This is actually good and useful.

BaBa Nigger Sheep - April 27, 2010, 12:08 pm

(Apr 27, 2010 11:44 AM)[Chocobro] Nilef Wrote: [\[CITE\]](#) This.

I completely agree, it's so nice to see a very well made beautiful none hacking related program like this pop up. I'm so in love with it, downloaded it and I've been using it instead of Notepad++ :P Apart from, i like it how when you have a .php file and you open it in notepad and its hard to read, but when you open it in Notepad++ it formats it into clean lines so you can read it. It would be awesome if Charny Notepad had that feature, but I'm not sure how you could implement it :P

snwspeckle - April 27, 2010, 12:56 pm

Just curious but what components are you using for the GUI? It seems you aren't using the stupid default windows form version. I would be really interested in the GUI.

Charny - April 27, 2010, 2:04 pm

Thanks for all the comments :D.

For the GUI, I used the default component. Change the 'RenderMode' to 'System' to get the same effects.

I'm currently working on a C# compiler, after that, I'll make a notepad like Notepad++, it will support many language (Syntax highlighting) and etc.

Scrat - April 27, 2010, 2:24 pm

Greatttt so cool I want to see the source though can I?

Ouh yes I forgot the magic word "Please" no rly please post the source! ^^

Charny - April 27, 2010, 2:34 pm

I don't know if I'll post the source.. There will be a lot of leechers...

snwspeckle - April 27, 2010, 4:21 pm

How do you remove that little white bar underneath the menustrip?

Charny - April 27, 2010, 4:30 pm

(Apr 27, 2010 04:21 PM)snwspeckle Wrote: [\[CITE\]](#) How do you remove that little white bar underneath the menustrip?

The grip? If so, put the 'Grip Style' to hidden.

snwspeckle - April 27, 2010, 4:33 pm

No wait not that but nvm. Any chance you can pack all the images in this notepad and maybe send them to me? I would be glad to use them and the ones from Notepad++ don't help much since that program is a lot of Menu-Strip based.

Charny - April 27, 2010, 6:53 pm

Is syntax highlighting enabled on this yet? I can't find it anywhere. :S

Charny - May 1, 2010, 9:10 am

(May 1, 2010 06:45 AM)cooldude255220 Wrote: [\[CITE\]](#) Is syntax highlighting enabled on this yet? I can't find it anywhere. :S

It's in the RichTextBoxPrintCtrl component, check the commented codes.

?Cooldude? - May 1, 2010, 9:22 am

(May 1, 2010 09:10 AM)charny Wrote: [\[CITE\]](#) It's in the RichTextBoxPrintCtrl component, check the commented codes.

Does it only work with C# codes? Becuase it's not working with Visual basic ones.

Charny - May 1, 2010, 9:25 am

(May 1, 2010 09:22 AM)cooldude255220 Wrote: [\[CITE\]](#) Does it only work with C# codes? Becuase it's not working with Visual basic ones.

Hmm.. You must do that to add keywords :

```
Code RichTextBoxPrintCtrl rtb = new RichTextBoxPrintCtrl();
rtb.Settings.Keywords.Add("if");
rtb.Settings.Keywords.Add("Else");
...etc
```

```
rtb.Settings.Comment = "//";
rtb.CompileKeywords();
```

?Cooldude? - May 1, 2010, 9:44 am

(May 1, 2010 09:25 AM)charny Wrote: [\[CITE\]](#) Hmm.. You must do that to add keywords :
