Thread: [monetizing a 9gag clone site](#)

omer1994 - November 3, 2013, 2:02 am

hey guys i want to monetize my 9gag clone site i have a Top-level domain and using a paid hosting got a facebook fan page with tons of likes , twitter account and everything my traffic is from facebook but the thing is how to monetize the traffic i can get the traffic of 1000-2000 unique visitors daily but the 80% traffic is from Pakistan :/ i applied for the adsense but got rejected on the second review i didn't got any mail from them but when i logged into my adsense account they asked to resubmit the application so i resubmitted the application again but i don't think it will work or not :/ so i don't see any adsense alternate which have a high payout for traffic from Pakistan so i need a little advice how to get the adsense approved i have been trying to get the adsense for over 3 months and no luck :/ or if there is any other way to monetize the traffic then tell me ..

still waiting for the reply in short you guys can please tell me how to get the adsense ? :/ should i buy the account from fiverr ? confused :(

Learn SEO by reading books etc etc.

google.com/adsense

Follow the guidelines... and add the code for ads and away you go
