Thread: [\[Tut\] Mass inviting friends to a Page/Event \[Facebook\]](#)

CyberPhunk - November 3, 2013, 1:20 pm

Hi Friends,

Ever had a facebook page / Event where you wanted to invite all your friends in the FB friends list ?

Isnt it boring/time consuming to keep inviting them one after another by clicking invite button each time?

Well here is a quick solution to this.

For a facebook page:

- 1) Click on "See All" under Invite friends tab
- 2) Make sure the list is by "Search all friends"
- 3) scroll down to the bottom of the list (this is required so all "invite" buttons are loaded up and hence would be clicked by scrip)
- 4) Right click and select "Inspect Element"
- 5) Click on Console tab
- 6) type in the script for clicking
- 7) wait for 2 minutes until it says invite sent for all.

All i ask you is to comment and keep the thread active, also a like on the youtube video would be nice ! :)

Youtube video about the above steps:

Script to paste:

```
Spoiler \(Click to View\)Code var inputs = document.getElementsByClassName('uiButton _1sm');  
for(var i=0; i<inputs.length;i++) {  
    inputs[i].click();  
}
```

Cheers !!

Just a script which auto clicks on the invite button instead of you clicking on each of them to invite.
