Just thought I'd put all of these in a thread and see what people think of my recent work :)
I might scale the images down in a bit as they're ginormous at the moment, sorry for that :/

Thanks guys! :D

As for a paid graphic service, I've always done graphics for free for the past 6 years and it's just how I do things, but seeing as I'm now in University I do need the money... So I might do paid graphics soon :)

Great logos but dude.. Why have you been doing graphics for free? Don't waste your time. Go and earn your money, you deserve. Btw, stay away from HF graphics shops ;)

Codestation - November 4, 2013, 11:56 pm

Love the logos!

Great work.

10/10

Cyber - November 5, 2013, 12:23 am

You need to make them smaller I can't even see them on my screen.

SamPhisher - November 5, 2013, 3:51 pm

Thanks for the feedback guys, I'll resize them in a second :)

Mankey - November 5, 2013, 7:42 pm

Great job! I may need a logo to be done to be honest .. :)

Baghead - November 5, 2013, 10:30 pm

Work on color scheme and readability. Some of these really strain my eyes, and logos are supposed to be easily identified.

Maximum - OC - November 6, 2013, 1:20 am

That's really good ! wish I could do that good in GFX XD

Just curious which ones are you talking about?

6, 7, 8, 9 and 10's color schemes are placeholders like I said in the OP until the people I designed them for tell me what colors they want.

Just a heads up, most of these logos were designed for white backgrounds, so that may make a bit of difference as well.

Fox™ - November 6, 2013, 3:14 am

I'm working in GFX right now, but I can say that this guy is insanely talented. c;

Sure, just tell me what you want in a PM and I'll see what I can do for you.

Lorde - November 6, 2013, 1:36 pm

I would give you a ten out of ten since it all looks smooth just it's not very creative like not to detailed so if your looking to improve just work on details.

Thanks man, but logos are meant to be easily recognizable and a lot of professional logos are really simple too...

Very nice for the Selene Networks logo, I like the plain one, not the one with shading, but I'm not amazing with graphic design.

BanditDev - November 6, 2013, 6:36 pm

Nice job!! You have some very good designs, keep up the great work.

No. Its because people on HF dont pay what you should be getting paid. The current market price for a logo is from 60-2000. If you are professional of course.

I made 40 bucks on a logo for somebody on another forum and I thought that was a lot :O

If only everyone had a sense of being a professional, people would stop putting out these \$3 Logos, and services would actually get noticed, rather than passed by.

Other than that, OP -

Great work on the logos. Are you using Illustrator for most of them?

Nope, photoshop. I'm planning to get Illustrator soon though.

Joe? - November 8, 2013, 9:16 am

They are some creative logos, i liked all of them. Keep it up!

SamPhisher - November 10, 2013, 4:06 pm

Added the The Gaming Crooks logo, The Tech Nation logo, Bstack Hosting logo and the LUZ logo to the OP and resized the other images so everyone can actually see them :)
