First off, I doubt I'll be seeing this money again, which is a shame. A new-ish account, whom I doubt values his HackForums account with much concern.

Initially, the deal was for my Instagram account, the thread for this sale can be found here;
<https://hackforums.net/showthread.php?tid=3842478>

Jefferyx11, the member in question, Private messaged me, stating that he'd buy it for \$40, I initially denied this, needing atleast \$50. We came up with the deal that he'd pay \$40 upfront and \$10 within 2 weeks.

This pricing that we agreed on is shown here;

His response to this was;

The money was then sent to me; \$42 USD

Proof of this & proof of the charge-back;

This scam report isn't made because of the value of the money, but to alert other members to never deal with this member.

If there is anything else I need to include in this scam report; let me know.

Thank you & have a nice day.
