Seems like too much work, and I much rather not change my ways.

But thanks for the share; if I get bored, I may try this.

I have been eating them correctly. Just get the seeds out and eat them.

Onetwo - November 4, 2013, 11:14 pm

No I haven't. Because I haven't been eating pomegranates.

RoboHobo - November 4, 2013, 11:18 pm

How often do people in other countries eat pomegranate? D:<

I'm from America and I love pomegranates. The way I ate them as a kid (and sometimes still) is to toss it at a wall or on the ground and split it open. They were always messy lol. I will give this a try sometime.

That is pretty cool, I love pomegranates, I will definitely try this next time, looks far more easier than the way I was doing it.

Yeah. Better go spend it on something more valuable like that job you dont have :(

I haven't eaten a single pomegranate in about 3-4 months.

I remember when I was a kid it I would always have red hands and stains on my clothing after eating one.

I haven't ever used this sort of method to remove the insides of it.

I might as well try it.

I've been doing this my whole life... My brother taught me this.
