Vouch for Vinnie and his brand new VPN. Probably one of the best ones out there. I've tested it out and each server for a different country works with amazing speed.
Small question though, what VPN protocol are you using in the VPN application?

Thanks.

OpenVPN, PPTP & L2TP, does the Russian server work for you br0zif? One guy from the US said all the servers work good for him but the Russian server, but he is in the US that might be why he's having ping issues. Ping issues can be problematic both ways depending on your own ping when connecting to the servers.

Yeah, we're hella cheap for now due to new releases ?.

\$2 a month is an amazing offer for all of our servers and DDoS protection along with all the other features.

I'll bring it back up ASAP.

Okay, it's glitched out so when it's a white page just click refresh a couple of times and it'll work :)

Do that till I figure out what's gone through in the FTP.

I don't have time to run this so I'm going to close sales, on top of that contact this member for refunds as he was the PayPal holder, you will get a full refund if you purchased 6 months +. Anyone that purchased monthly subscriptions will have the VPN running for about another month before it's closed down so the monthly customers will get what they paid for, thank you.

Contact my PP holder for refunds of 6 months + purchases.
