I dont know about you guys, I personally did not like this anime, there was some parts that made me feel like I was watching something good, but for the most part I felt as if the anime just kept dragging and dragging. If you guys watched this anime, any opinions on it?

It wasn't terrible, but it is somewhere at the bottom of the list. The setting was kinda ok, but they really fked it up with having no context with most things whatsoever.

The only reason I watched it was because it was made by the same company that made Steins;Gate (which is awesome). If it wasn't for that, I would've never watched it.

I'll probably give it a 3 or 4 out of 10.

I agree with this post, i only watched it cuz of steins gate ; i also watched robotics notes and that sucked too.

Everything in Chaos;Head was a delusion, anyone get the pun?

The parts where Frau Brow (or w/e she's called) was talking like a nerd were probably the most entertaining parts of the anime.

The quote from the intro (1st/2nd not sure) was kinda nice tho:

">As for the science, it may be negative.

However, do not forget the thing that there is a scientific side in all the one.

The important one is true.

of me the ruler of my fate, and me also the commander of my soul.

The VN for chaos head a lot better than the anime. The anime was a failure in my opinion.

Try watching Steins;Gate, I think they are related, and Steins;Gate is certainly a great anime.

They dragged it out really slow but like others, i only watched it because i loved Steins gate.
