Thread: [\[Q\] How to programmatically/automaticly create twitter accounts?](#)

hackdaywalker - November 6, 2013, 7:32 am

Hello,

How do people in twitter followers business automaticly create twitter accounts?

What tools they use? custom? underground? manually?

Creating a script to control group of accounts to follow certain username is easy using twitter API. The hard part is the "creation of accounts".

Any tutorials, articles or references is appreciated.

Regards

i'm looking for the same thing as OP.

Been really interested in what program/tool they use.

digioji - November 8, 2013, 9:22 am

Yeah same here. I'm a programmer but I don't know where to start. It would be great if there is any article.

Ive heard of one called TWTdominator:

<http://www.twtdominator.com/>

Which is good for twitter marketing and management, it does cost however for full version
cough or get the crack like me *cough*
